## Product datasheet for RC220860L3V

## HFE (NM\_139011) Human Tagged ORF Clone Lentiviral Particle

## **Product data:**

Product Type:	Lentiviral Particles
Product Name:	HFE (NM_139011) Human Tagged ORF Clone Lentiviral Particle
Symbol:	HFE
Synonyms:	HFE1; HH; HLA-H; MVCD7; TFQTL2
Mammalian Cell Selection:	Puromycin
Vector:	pLenti-C-Myc-DDK-P2A-Puro (PS100092)
Tag:	Myc-DDK
ACCN:	NM_139011
ORF Size:	228 bp
ORF Nucleotide Sequence:	The ORF insert of this clone is exactly the same as(RC220860).
OTI Disclaimer:	The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <u>More info</u>
OTI Annotation:	This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene.
RefSeq:	<u>NM 139011.2</u>
RefSeq Size:	1406 bp
RefSeq ORF:	231 bp
Locus ID:	3077
UniProt ID:	<u>Q30201</u>
Cytogenetics:	6p22.2
Protein Families:	Druggable Genome, Transmembrane
MW:	8.2 kDa

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2022 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

Gene Summary:The protein encoded by this gene is a membrane protein that is similar to MHC class I-type<br/>proteins and associates with beta2-microglobulin (beta2M). It is thought that this protein<br/>functions to regulate iron absorption by regulating the interaction of the transferrin receptor<br/>with transferrin. The iron storage disorder, hereditary haemochromatosis, is a recessive<br/>genetic disorder that results from defects in this gene. At least nine alternatively spliced<br/>variants have been described for this gene. Additional variants have been found but their full-<br/>length nature has not been determined. [provided by RefSeq, Jul 2008]
