

Product datasheet for **RC220905L3V**

Lipophilin B (SCGB1D2) (NM_006551) Human Tagged ORF Clone Lentiviral Particle

Product data:

| | |
|---------------------------|--|
| Product Type: | Lentiviral Particles |
| Product Name: | Lipophilin B (SCGB1D2) (NM_006551) Human Tagged ORF Clone Lentiviral Particle |
| Symbol: | Lipophilin B |
| Synonyms: | LIPB; LPHB; LPNB |
| Mammalian Cell Selection: | Puromycin |
| Vector: | pLenti-C-Myc-DDK-P2A-Puro (PS100092) |
| Tag: | Myc-DDK |
| ACCN: | NM_006551 |
| ORF Size: | 270 bp |
| ORF Nucleotide Sequence: | The ORF insert of this clone is exactly the same as(RC220905). |
| OTI Disclaimer: | The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. More info |
| OTI Annotation: | This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene. |
| RefSeq: | NM_006551.3 |
| RefSeq Size: | 454 bp |
| RefSeq ORF: | 273 bp |
| Locus ID: | 10647 |
| UniProt ID: | O95969 |
| Cytogenetics: | 11q12.3 |
| Protein Families: | Secreted Protein |
| MW: | 9.9 kDa |

Gene Summary:

The protein encoded by this gene is a member of the lipophilin subfamily, part of the uteroglobin superfamily, and is an ortholog of prostatein, the major secretory glycoprotein of the rat ventral prostate gland. Lipophilin gene products are widely expressed in normal tissues, especially in endocrine-responsive organs. Assuming that human lipophilins are the functional counterparts of prostatein, they may be transcriptionally regulated by steroid hormones, with the ability to bind androgens, other steroids and possibly bind and concentrate estramustine, a chemotherapeutic agent widely used for prostate cancer. Although the gene has been reported to be on chromosome 10, this sequence appears to be from a cluster of genes on chromosome 11 that includes mammaglobin 2. [provided by RefSeq, Jul 2008]
