

Product datasheet for RC221104L1

CNN2 (NM_004368) Human Tagged Lenti ORF Clone

Product data:

OriGene Technologies, Inc.

9620 Medical Center Drive, Ste 200 Rockville, MD 20850, US Phone: +1-888-267-4436 https://www.origene.com techsupport@origene.com EU: info-de@origene.com CN: techsupport@origene.cn

	EcoRI BamHI RBS SgfI ORF
	Kozak Consensus
	GCG ATC GC ATG// NNN ACG CGT
	Sgf i ORF Miu i
	Cloning sites used for ORF Shuttling:
Cloning Scheme:	
Restriction Sites:	Sgfl-Mlul
Sequence:	
ORF Nucleotide	The ORF insert of this clone is exactly the same as(RC221104)
E. coli Selection:	Chloramphenicol (34 ug/mL)
Vector:	pLenti-C-Myc-DDK (PS100064)
Mammalian Cell Selection:	None
Symbol:	CNN2
Tag:	Myc-DDK
Product Name:	CNN2 (NM_004368) Human Tagged Lenti ORF Clone
Product Type:	Expression Plasmids

	(NM_004368) Human Tagged Lenti ORF Clone – RC221104L1
OTI Disclaimer:	Due to the inherent nature of this plasmid, standard methods to replicate additional amounts of DNA in E. coli are highly likely to result in mutations and/or rearrangements. Therefore, OriGene does not guarantee the capability to replicate this plasmid DNA. Additional amounts of DNA can be purchased from OriGene with batch-specific, full-sequence verification at a reduced cost. Please contact our customer care team at <u>custsupport@origene.com</u> or by calling 301.340.3188 option 3 for pricing and delivery.
	The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <u>More info</u>
OTI Annotation:	This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene.
Components:	The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).
Reconstitution Method	 Centrifuge at 5,000xg for 5min. Carefully open the tube and add 100ul of sterile water to dissolve the DNA. Close the tube and incubate for 10 minutes at room temperature. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid at the bottom. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of shipping when stored at -20°C.
RefSeq:	<u>NM 004368.2</u>
RefSeq Size:	2478 bp
RefSeq ORF:	930 bp
Locus ID:	1265
UniProt ID:	<u>Q99439</u>
Cytogenetics:	19p13.3
Domains:	calponin, CH
MW:	33.5 kDa
Gene Summary:	The protein encoded by this gene, which can bind actin, calmodulin, troponin C, and tropomyosin, may function in the structural organization of actin filaments. The encoded protein could play a role in smooth muscle contraction and cell adhesion. Several pseudogenes of this gene have been identified, and are present on chromosomes 1, 2, 3, 6, 9, 11, 13, 15, 16, 21 and 22. Alternative splicing results in multiple transcript variants encoding
