

Product datasheet for **RC221129L4V**

ZFAND5 (NM_001102421) Human Tagged ORF Clone Lentiviral Particle

Product data:

| | |
|---------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Product Type: | Lentiviral Particles |
| Product Name: | ZFAND5 (NM_001102421) Human Tagged ORF Clone Lentiviral Particle |
| Symbol: | ZFAND5 |
| Synonyms: | ZA20D2; ZFAND5A; ZNF216 |
| Mammalian Cell Selection: | Puromycin |
| Vector: | pLenti-C-mGFP-P2A-Puro (PS100093) |
| Tag: | mGFP |
| ACCN: | NM_001102421 |
| ORF Size: | 639 bp |
| ORF Nucleotide Sequence: | The ORF insert of this clone is exactly the same as(RC221129). |
| OTI Disclaimer: | The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. More info |
| OTI Annotation: | This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene. |
| RefSeq: | NM_001102421.1 , NP_001095891.1 |
| RefSeq Size: | 5750 bp |
| RefSeq ORF: | 642 bp |
| Locus ID: | 7763 |
| UniProt ID: | O76080 |
| Cytogenetics: | 9q21.13 |
| MW: | 23.1 kDa |

Gene Summary:

Involved in protein degradation via the ubiquitin-proteasome system. May act by anchoring ubiquitinated proteins to the proteasome. Plays a role in ubiquitin-mediated protein degradation during muscle atrophy. Plays a role in the regulation of NF-kappa-B activation and apoptosis. Inhibits NF-kappa-B activation triggered by overexpression of RIPK1 and TRAF6 but not of RELA. Inhibits also tumor necrosis factor (TNF), IL-1 and TLR4-induced NF-kappa-B activation in a dose-dependent manner. Overexpression sensitizes cells to TNF-induced apoptosis. Is a potent inhibitory factor for osteoclast differentiation.
[UniProtKB/Swiss-Prot Function]
