

Product datasheet for RC221130

UBE2W (NM 001001481) Human Tagged ORF Clone

Product data:

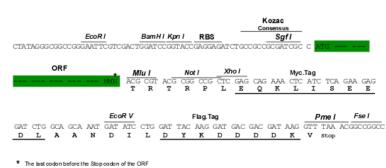

Tag:

Symbol:

Selection: Vector:

Product Type: **Expression Plasmids Product Name:** UBE2W (NM_001001481) Human Tagged ORF Clone Myc-DDK UBE2W UBC-16; UBC16 Synonyms: **Mammalian Cell** Neomycin pCMV6-Entry (PS100001) E. coli Selection: Kanamycin (25 ug/mL) **Restriction Sites:** Sgfl-Mlul Cloning sites used for ORF Shuttling: **Cloning Scheme:**

ACCN: **ORF Size:**

NM 001001481 486 bp

| | (NM_001001481) Human Tagged ORF Clone – RC221130 |
|------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| OTI Disclaimer: | The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <u>More info</u> |
| OTI Annotation: | This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene. |
| Components: | The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water). |
| Reconstitution Method: | Centrifuge at 5,000xg for 5min. Carefully open the tube and add 100ul of sterile water to dissolve the DNA. Close the tube and incubate for 10 minutes at room temperature. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid at the bottom. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of shipping when stored at -20°C. |
| RefSeq: | <u>NM 001001481.1, NP 001001481.1</u> |
| RefSeq Size: | 4057 bp |
| RefSeq ORF: | 489 bp |
| Locus ID: | 55284 |
| UniProt ID: | <u>Q96B02</u> |
| Cytogenetics: | 8q21.11 |
| Protein Families: | Transcription Factors |
| Protein Pathways: | Ubiquitin mediated proteolysis |
| MW: | 18.5 kDa |
| Gene Summary: | This gene encodes a nuclear-localized ubiquitin-conjugating enzyme (E2) that, along with ubiquitin-activating (E1) and ligating (E3) enzymes, coordinates the addition of a ubiquitin moiety to existing proteins. The encoded protein promotes the ubiquitination of Fanconi anemia complementation group proteins and may be important in the repair of DNA damage. There is a pseudogene for this gene on chromosome 1. Alternative splicing results in multiple transcript variants. [provided by RefSeq, Aug 2012] |
