## Product datasheet for RC221512L4V

## UBF1 (UBTF) (NM\_001076684) Human Tagged ORF Clone Lentiviral Particle

## **Product data:**

Product Type:	Lentiviral Particles
Product Name:	UBF1 (UBTF) (NM_001076684) Human Tagged ORF Clone Lentiviral Particle
Symbol:	UBF1
Synonyms:	CONDBA; NOR-90; UBF; UBF-1; UBF1; UBF2
Mammalian Cell Selection:	Puromycin
Vector:	pLenti-C-mGFP-P2A-Puro (PS100093)
Tag:	mGFP
ACCN:	NM_001076684
ORF Size:	2181 bp
ORF Nucleotide Sequence:	The ORF insert of this clone is exactly the same as(RC221512).
OTI Disclaimer:	The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <u>More info</u>
OTI Annotation:	This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene.
RefSeq:	<u>NM 001076684.1</u>
RefSeq Size:	4604 bp
RefSeq ORF:	2184 bp
Locus ID:	7343
UniProt ID:	<u>P17480</u>
Cytogenetics:	17q21.31
Protein Families:	Transcription Factors
MW:	84.8 kDa

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2023 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

Gene Summary:This gene encodes a member of the HMG-box DNA-binding protein family. The encoded<br/>protein plays a critical role in ribosomal RNA transcription as a key component of the pre-<br/>initiation complex, mediating the recruitment of RNA polymerase I to rDNA promoter regions.<br/>The encoded protein may also play important roles in chromatin remodeling and pre-rRNA<br/>processing, and its activity is regulated by both phosphorylation and acetylation. Alternatively<br/>spliced transcript variants encoding multiple isoforms have been observed for this gene.<br/>Pseudogenes of this gene are located on the short arm of chromosomes 3, 11 and X and the<br/>long arm of chromosome 11. [provided by RefSeq, Aug 2011]
