

Product datasheet for RC221543L4

TAF5L (NM_014409) Human Tagged Lenti ORF Clone

Product data:

Product Type: Expression Plasmids

Product Name: TAF5L (NM_014409) Human Tagged Lenti ORF Clone

Tag:mGFPSymbol:TAF5LSynonyms:PAF65B

Mammalian Cell Puromycin

Selection:

Vector: pLenti-C-mGFP-P2A-Puro (PS100093)

E. coli Selection: Chloramphenicol (34 ug/mL)

ORF Nucleotide The ORF insert of this clone is exactly the same as(RC221543).

Sequence:

Restriction Sites: Sgfl-Mlul

Cloning Scheme:

st The last codon before the Stop codon of the ORF.

ACCN: NM_014409

ORF Size: 1767 bp

TAF5L (NM_014409) Human Tagged Lenti ORF Clone - RC221543L4

OTI Disclaimer: The molecular sequence of this clone aligns with the gene accession number as a point of

reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

OTI Annotation: This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

Components: The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube

containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).

Reconstitution Method: 1. Centrifuge at 5,000xg for 5min.

2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.

3. Close the tube and incubate for 10 minutes at room temperature.

4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid

at the bottom.

5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of

shipping when stored at -20°C.

RefSeq: <u>NM 014409.3</u>

 RefSeq Size:
 3122 bp

 RefSeq ORF:
 1770 bp

 Locus ID:
 27097

 UniProt ID:
 075529

Cytogenetics: 1q42.13

Domains: WD40, TFIID WDA

Protein Families: Transcription Factors

Protein Pathways: Basal transcription factors

MW: 66 kDa

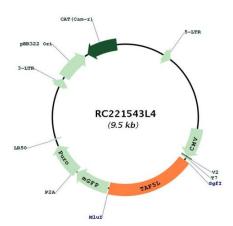

Gene Summary: The product of this gene belongs to the WD-repeat TAF5 family of proteins. This gene encodes

a protein that is a component of the PCAF histone acetylase complex. The PCAF histone acetylase complex, which is composed of more than 20 polypeptides some of which are TAFs, is required for myogenic transcription and differentiation. TAFs may participate in basal transcription, serve as coactivators, function in promoter recognition or modify general transcription factors to facilitate complex assembly and transcription initiation. The encoded protein is structurally similar to one of the histone-like TAFs, TAF5. Alternatively spliced transcript variants encoding different isoforms have been identified for this gene. [provided

by RefSeq, Jul 2008]
