

## Product datasheet for RC221555L4

#### OriGene Technologies, Inc.

9620 Medical Center Drive, Ste 200 Rockville, MD 20850, US Phone: +1-888-267-4436 https://www.origene.com techsupport@origene.com EU: info-de@origene.com CN: techsupport@origene.cn

### ARMET (MANF) (NM\_006010) Human Tagged Lenti ORF Clone

#### **Product data:**

**Product Type:** Expression Plasmids

**Product Name:** ARMET (MANF) (NM\_006010) Human Tagged Lenti ORF Clone

Tag: mGFP Symbol: ARMET

Synonyms: ARMET; ARP

Mammalian Cell Puromycin

Selection:

**Vector:** pLenti-C-mGFP-P2A-Puro (PS100093)

E. coli Selection: Chloramphenicol (34 ug/mL)

ORF Nucleotide The ORF insert of this clone is exactly the same as(RC221555).

Sgfl-Mlul

Sequence:

Restriction Sites: Cloning Scheme:

<sup>\*</sup> The last codon before the Stop codon of the ORF

**ACCN:** NM\_006010

ORF Size: 555 bp

#### ARMET (MANF) (NM\_006010) Human Tagged Lenti ORF Clone - RC221555L4

**OTI Disclaimer:** The molecular sequence of this clone aligns with the gene accession number as a point of

reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

**OTI Annotation:** This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

**Components:** The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube

containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).

**Reconstitution Method:** 1. Centrifuge at 5,000xg for 5min.

2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.

3. Close the tube and incubate for 10 minutes at room temperature.

4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid

at the bottom.

5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of

shipping when stored at -20°C.

RefSeq: <u>NM 006010.5</u>, <u>NP 006001.4</u>

 RefSeq Size:
 993 bp

 RefSeq ORF:
 549 bp

 Locus ID:
 7873

 UniProt ID:
 P55145

 Cytogenetics:
 3p21.2

**Protein Families:** Druggable Genome, Secreted Protein

MW: 21.6 kDa

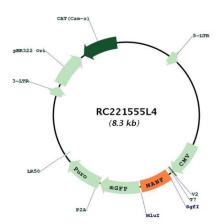

**Gene Summary:** The protein encoded by this gene is localized in the endoplasmic reticulum (ER) and golgi, and

is also secreted. Reducing expression of this gene increases susceptibility to ER stress-induced death and results in cell proliferation. Activity of this protein is important in promoting the survival of dopaminergic neurons. The presence of polymorphisms in the N-terminal arginine-rich region, including a specific mutation that changes an ATG start codon to AGG, have been reported in a variety of solid tumors; however, these polymorphisms were later shown to exist in normal tissues and are thus no longer thought to be tumor-related.
