OTI Disclaimer:

Sequence:

The ORF insert of this clone is exactly the same as(RC221728).

The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through

naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

OTI Annotation: This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

S100P binding protein (S100PBP) (NM_001017406) Human Tagged ORF Clone Lentiviral Particle – RC221728L3V

Gene Summary:

This gene encodes a protein that was originally identified by its interaction with S100 calciumbinding protein P. Expression of this protein has been reported to be associated with pancreatic ductal adenocarcinoma. Alternatively spliced transcript variants have been described. [provided by RefSeq, Jan 2012]
