## RAP1B (NM\_001010942) Human Tagged ORF Clone Lentiviral Particle

**Product data:** 

Product Type: Lentiviral Particles

**Product Name:** RAP1B (NM\_001010942) Human Tagged ORF Clone Lentiviral Particle

Symbol: RAP1B

Synonyms: K-REV; RAL1B

Mammalian Cell None

Selection:

Vector:

pLenti-C-mGFP (PS100071)

Tag: mGFP

ACCN: NM 001010942

ORF Size: 552 bp

**ORF Nucleotide** 

The ORF insert of this clone is exactly the same as(RC221793).

OTI Disclaimer:

Sequence:

The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

**OTI Annotation:** This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

**RefSeg:** NM 001010942.1

RefSeq Size: 2117 bp
RefSeq ORF: 555 bp
Locus ID: 5908
UniProt ID: P61224
Cytogenetics: 12q15

**Protein Families:** Druggable Genome

## RAP1B (NM\_001010942) Human Tagged ORF Clone Lentiviral Particle - RC221793L2V

Protein Pathways: Chemokine signaling pathway, Focal adhesion, Leukocyte transendothelial migration, Long-

term potentiation, MAPK signaling pathway, Neurotrophin signaling pathway, Renal cell

carcinoma

MW: 20.6 kDa

**Gene Summary:** This gene encodes a member of the RAS-like small GTP-binding protein superfamily.

Members of this family regulate multiple cellular processes including cell adhesion and growth and differentiation. This protein localizes to cellular membranes and has been shown to regulate integrin-mediated cell signaling. This protein also plays a role in regulating

outside-in signaling in platelets. Alternate splicing results in multiple transcript variants.

Pseudogenes of this gene are found on chromosomes 3, 5, 6 and 9. [provided by RefSeq, Oct

2011]
