## LBP (NM\_004139) Human Tagged ORF Clone Lentiviral Particle

**Product data:** 

**Product Type:** Lentiviral Particles

**Product Name:** LBP (NM\_004139) Human Tagged ORF Clone Lentiviral Particle

Symbol: LBP

Synonyms: BPIFD2

Mammalian Cell None

Selection:

**Vector:** pLenti-C-Myc-DDK (PS100064)

Tag: Myc-DDK

**ACCN:** NM\_004139

ORF Size: 1443 bp

**ORF Nucleotide** 

The ORF insert of this clone is exactly the same as(RC221961).

Sequence:

**OTI Disclaimer:** The molecular sequence of this clone aligns with the gene accession number as a point of

reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

**OTI Annotation:** This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

**RefSeg:** NM 004139.2

RefSeq Size: 1823 bp
RefSeq ORF: 1446 bp
Locus ID: 3929
UniProt ID: P18428

Cytogenetics: 20q11.23

Domains: BPI1

**Protein Families:** Druggable Genome, Secreted Protein

## LBP (NM\_004139) Human Tagged ORF Clone Lentiviral Particle - RC221961L1V

**Protein Pathways:** Toll-like receptor signaling pathway

MW: 53.38 kDa

**Gene Summary:** The protein encoded by this gene is involved in the acute-phase immunologic response to

gram-negative bacterial infections. Gram-negative bacteria contain a glycolipid,

lipopolysaccharide (LPS), on their outer cell wall. Together with bactericidal permeability-increasing protein (BPI), the encoded protein binds LPS and interacts with the CD14 receptor, probably playing a role in regulating LPS-dependent monocyte responses. Studies in mice suggest that the encoded protein is necessary for the rapid acute-phase response to LPS but not for the clearance of LPS from circulation. This protein is part of a family of structurally and functionally related proteins, including BPI, plasma cholesteryl ester transfer protein

(CETP), and phospholipid transfer protein (PLTP). [provided by RefSeq, Apr 2012]
