## CKLF (NM\_001040138) Human Tagged ORF Clone Lentiviral Particle

**Product data:** 

**Product Type:** Lentiviral Particles

Product Name: CKLF (NM 001040138) Human Tagged ORF Clone Lentiviral Particle

Symbol: CKLF

Synonyms: C32; CKLF1; CKLF2; CKLF3; CKLF4; HSPC224; UCK-1

Mammalian Cell

Selection:

Puromycin

**Vector:** pLenti-C-Myc-DDK-P2A-Puro (PS100092)

Tag: Myc-DDK

**ACCN:** NM\_001040138

ORF Size: 339 bp

**ORF Nucleotide** 

The ORF insert of this clone is exactly the same as(RC222344).

Sequence:

Cytogenetics:

OTI Disclaimer: The molecular sequence of this clone aligns with the gene accession number as a point of

reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

**OTI Annotation:** This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

**RefSeq:** NM 001040138.2, NP 001035228.1

16q21

RefSeq Size: 691 bp
RefSeq ORF: 342 bp
Locus ID: 51192
UniProt ID: Q9UBR5

**Protein Families:** Druggable Genome, Secreted Protein, Transmembrane

**MW:** 12.9 kDa

## **Gene Summary:**

The product of this gene is a cytokine. Cytokines are small proteins that have an essential role in the immune and inflammatory responses. This gene is one of several chemokine-like factor genes located in a cluster on chromosome 16. The protein encoded by this gene is a potent chemoattractant for neutrophils, monocytes and lymphocytes. It also can stimulate the proliferation of skeletal muscle cells. This protein may play important roles in inflammation and in the regeneration of skeletal muscle. Alternatively spliced transcript variants encoding different isoforms have been identified. Naturally occurring read-through transcription occurs between this locus and the neighboring locus CMTM1 (CKLF-like MARVEL transmembrane domain containing 1).[provided by RefSeq, Feb 2011]
