

# Product datasheet for RC222351L1

### CAMK2G (NM\_172170) Human Tagged Lenti ORF Clone

### **Product data:**

#### **Product Type: Expression Plasmids Product Name:** CAMK2G (NM\_172170) Human Tagged Lenti ORF Clone Tag: Myc-DDK Symbol: CAMK2G Synonyms: CAMK; CAMK-II; CAMKG; MRD59 **Mammalian Cell** None Selection: Vector: pLenti-C-Myc-DDK (PS100064) E. coli Selection: Chloramphenicol (34 ug/mL) The ORF insert of this clone is exactly the same as(RC222351). **ORF** Nucleotide Sequence: **Restriction Sites:** Sgfl-Mlul **Cloning Scheme:** Cloning sites used for ORF Shuttling: ORF Sqf I Mlu I --- GCG ATC GC C ATG --- //--- NNN ACG CGT ---

\* The last codon before the Stop codon of the ORF.

ACCN: ORF Size: NM\_172170 1554 bp

|                        | G (NM_172170) Human Tagged Lenti ORF Clone – RC222351L1  |
|------------------------|--|
| OTI Disclaimer:        | The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <u>More info</u>  |
| OTI Annotation:        | This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene.   |
| Components:            | The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).   |
| Reconstitution Method: | <ol> <li>Centrifuge at 5,000xg for 5min.</li> <li>Carefully open the tube and add 100ul of sterile water to dissolve the DNA.</li> <li>Close the tube and incubate for 10 minutes at room temperature.</li> <li>Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid at the bottom.</li> <li>Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of shipping when stored at -20°C.</li> </ol>   |
| RefSeq:                | <u>NM 172170.2</u>   |
| RefSeq Size:           | 3712 bp  |
| RefSeq ORF:            | 1557 bp  |
| Locus ID:              | 818  |
| Cytogenetics:          | 10q22.2  |
| Protein Families:      | Druggable Genome, Protein Kinase   |
| Protein Pathways:      | Calcium signaling pathway, ErbB signaling pathway, Glioma, GnRH signaling pathway, Long-<br>term potentiation, Melanogenesis, Neurotrophin signaling pathway, Olfactory transduction,<br>Oocyte meiosis, Wnt signaling pathway   |
| MW:                    | 58.2 kDa   |
| Gene Summary:          | The product of this gene is one of the four subunits of an enzyme which belongs to the serine/threonine protein kinase family, and to the Ca(2+)/calmodulin-dependent protein kinase subfamily. Calcium signaling is crucial for several aspects of plasticity at glutamatergic synapses. In mammalian cells the enzyme is composed of four different chains: alpha, beta, gamma, and delta. The product of this gene is a gamma chain. Many alternatively spliced transcripts encoding different isoforms have been described but the full-length nature of all the variants has not been determined.[provided by RefSeq, Mar 2011] |
