

## Product datasheet for RC222364

### UTY (NM\_182659) Human Tagged ORF Clone

#### Product data:

Product Type:	Expression Plasmids
Product Name:	UTY (NM_182659) Human Tagged ORF Clone
Tag:	Myc-DDK
Symbol:	UTY
Synonyms:	KDM6AL; KDM6C; UTY1
Vector:	pCMV6-Entry (PS100001)
E. coli Selection:	Kanamycin (25 ug/mL)
Cell Selection:	Neomycin
ORF Nucleotide Sequence:	>RC222364 representing NM_182659 Red=Cloning site Blue=ORF Green=Tags(s)

TRTRPLEQKLISEEDLAANDILDYKDDDDKV

Restriction Sites:

SgfI-MluI

Cloning Scheme:

\* The last codon before the Stop codon of the ORF

**Plasmid Map:**

**ACCN:** NM\_182659

**ORF Size:** 3720 bp

**OTI Disclaimer:** The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. [More info](#)

**OTI Annotation:** This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene.

**Components:** The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).

**Reconstitution Method:**

1. Centrifuge at 5,000xg for 5min.
2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.
3. Close the tube and incubate for 10 minutes at room temperature.
4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid at the bottom.
5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of shipping when stored at -20°C.

**RefSeq:** [NM\\_182659.1](#), [NP\\_872600.1](#)

**RefSeq Size:** 4931 bp

**RefSeq ORF:** 3723 bp

**Locus ID:** 7404

**UniProt ID:** [O14607](#)

**Cytogenetics:** Yq11.221

**Protein Families:** Transmembrane

**MW:** 137 kDa

**Gene Summary:** This gene encodes a protein containing tetratricopeptide repeats which are thought to be involved in protein-protein interactions. The encoded protein is also a minor histocompatibility antigen which may induce graft rejection of male stem cell grafts. A large number of alternatively spliced transcripts have been observed for this gene, but the full length nature of some of these variants has not been determined. [provided by RefSeq, Apr 2012]
