

## **Product datasheet for RC222456L3**

## GIP (NM\_004123) Human Tagged Lenti ORF Clone

**Product data:** 

**Product Type:** Expression Plasmids

**Product Name:** GIP (NM\_004123) Human Tagged Lenti ORF Clone

Tag: Myc-DDK

Symbol: GIP

Mammalian Cell Puromycin

Selection:

**Vector:** pLenti-C-Myc-DDK-P2A-Puro (PS100092)

E. coli Selection: Chloramphenicol (34 ug/mL)

ORF Nucleotide The ORF insert of this

Sequence:

The ORF insert of this clone is exactly the same as(RC222456).

Restriction Sites: Sgfl-Mlul

**Cloning Scheme:** 

<sup>\*</sup> The last codon before the Stop codon of the ORF.

**ACCN:** NM\_004123

ORF Size: 459 bp

**OriGene Technologies, Inc.** 9620 Medical Center Drive, Ste 200

## GIP (NM\_004123) Human Tagged Lenti ORF Clone - RC222456L3

**OTI Disclaimer:** The molecular sequence of this clone aligns with the gene accession number as a point of

reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

**OTI Annotation:** This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

**Components:** The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube

containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).

**Reconstitution Method:** 1. Centrifuge at 5,000xg for 5min.

2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.

3. Close the tube and incubate for 10 minutes at room temperature.

4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid

at the bottom.

5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of

shipping when stored at -20°C.

RefSeq: <u>NM 004123.2</u>

RefSeq Size: 711 bp
RefSeq ORF: 462 bp
Locus ID: 2695
UniProt ID: P09681

Cytogenetics: 17q21.32

**Protein Families:** Druggable Genome, Secreted Protein

**MW:** 17.1 kDa

**Gene Summary:** This gene encodes an incretin hormone and belongs to the glucagon superfamily. The

encoded protein is important in maintaining glucose homeostasis as it is a potent stimulator

of insulin secretion from pancreatic beta-cells following food ingestion and nutrient

absorption. This gene stimulates insulin secretion via its G protein-coupled receptor activation of adenylyl cyclase and other signal transduction pathways. It is a relatively poor inhibitor of

gastric acid secretion. [provided by RefSeq, Jul 2008]
