## ABCB4 (NM\_000443) Human Tagged ORF Clone Lentiviral Particle

**Product data:** 

**Product Type:** Lentiviral Particles

**Product Name:** ABCB4 (NM\_000443) Human Tagged ORF Clone Lentiviral Particle

Symbol: ABCB4

Synonyms: ABC21; GBD1; ICP3; MDR2; MDR2/3; MDR3; PFIC-3; PGY3

Mammalian Cell

Selection:

Puromycin

**Vector:** pLenti-C-Myc-DDK-P2A-Puro (PS100092)

 Tag:
 Myc-DDK

 ACCN:
 NM\_000443

ORF Size: 3837 bp

**ORF Nucleotide** 

The ORF insert of this clone is exactly the same as(RC222574).

Sequence:

OTI Disclaimer: The molecular sequence of this clone aligns with the gene accession number as a point of

reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

**OTI Annotation:** This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

**RefSeg:** NM 000443.2, NP 000434.1

 RefSeq Size:
 5764 bp

 RefSeq ORF:
 3840 bp

 Locus ID:
 5244

 UniProt ID:
 P21439

 Cytogenetics:
 7q21.12

**Domains:** ABC\_membrane, ABC\_tran, AAA

**Protein Families:** Druggable Genome, Transmembrane

## ABCB4 (NM\_000443) Human Tagged ORF Clone Lentiviral Particle - RC222574L3V

**Protein Pathways:** ABC transporters

MW: 140.5 kDa

**Gene Summary:** The membrane-associated protein encoded by this gene is a member of the superfamily of

ATP-binding cassette (ABC) transporters. ABC proteins transport various molecules across extra- and intra-cellular membranes. ABC genes are divided into seven distinct subfamilies (ABC1, MDR/TAP, MRP, ALD, OABP, GCN20, White). This protein is a member of the MDR/TAP subfamily. Members of the MDR/TAP subfamily are involved in multidrug resistance as well as antigen presentation. This gene encodes a full transporter and member of the p-glycoprotein family of membrane proteins with phosphatidylcholine as its substrate. The function of this protein has not yet been determined; however, it may involve transport of phospholipids from liver hepatocytes into bile. Alternative splicing of this gene results in several products of

undetermined function. [provided by RefSeq, Jul 2008]
