

Product datasheet for **RC222623L3V**

ANKHD1 (NM_024668) Human Tagged ORF Clone Lentiviral Particle

Product data:

| | |
|---------------------------|--|
| Product Type: | Lentiviral Particles |
| Product Name: | ANKHD1 (NM_024668) Human Tagged ORF Clone Lentiviral Particle |
| Symbol: | ANKHD1 |
| Synonyms: | MASK; MASK1; PP2500; VBARP |
| Mammalian Cell Selection: | Puromycin |
| Vector: | pLenti-C-Myc-DDK-P2A-Puro (PS100092) |
| Tag: | Myc-DDK |
| ACCN: | NM_024668 |
| ORF Size: | 1881 bp |
| ORF Nucleotide Sequence: | The ORF insert of this clone is exactly the same as(RC222623). |
| OTI Disclaimer: | The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. More info |
| OTI Annotation: | This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene. |
| RefSeq: | NM_024668.2 |
| RefSeq Size: | 2194 bp |
| RefSeq ORF: | 1884 bp |
| Locus ID: | 54882 |
| UniProt ID: | Q8IWX3 |
| Cytogenetics: | 5q31.3 |
| Domains: | ANK |
| MW: | 64.9 kDa |

Gene Summary:

This gene encodes a protein with multiple ankyrin repeat domains and a single KH-domain. The protein is thought to function as a scaffolding protein, and it may be involved in the regulation of caspases and thereby play an antiapoptotic role in cell survival. Alternative splicing results in multiple transcript variants, one of which generates a fusion transcript (MASK-BP3) with the downstream eIF4E-binding protein 3 (EIF4EBP3) gene, resulting in a protein comprised of the ANKHD1 sequence for the majority of the protein and a different C-terminus due to an alternate reading frame for the EIF4EBP3 segments. [provided by RefSeq, Sep 2010]
