## Product datasheet for RC222953L4V

## CYP27A1 (NM\_000784) Human Tagged ORF Clone Lentiviral Particle

## **Product data:**

Product Type:	Lentiviral Particles
Product Name:	CYP27A1 (NM_000784) Human Tagged ORF Clone Lentiviral Particle
Symbol:	CYP27A1
Synonyms:	CP27; CTX; CYP27
Mammalian Cell Selection:	Puromycin
Vector:	pLenti-C-mGFP-P2A-Puro (PS100093)
Tag:	mGFP
ACCN:	NM_000784
ORF Size:	1593 bp
ORF Nucleotide Sequence:	The ORF insert of this clone is exactly the same as(RC222953).
OTI Disclaimer:	The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <u>More info</u>
OTI Annotation:	This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene.
RefSeq:	<u>NM 000784.2</u>
RefSeq Size:	2059 bp
RefSeq ORF:	1596 bp
Locus ID:	1593
UniProt ID:	<u>Q02318</u>
Cytogenetics:	2q35
Domains:	p450
Protein Families:	Druggable Genome, P450

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2022 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

CYP27A1 (NM_000784) Human Tagged ORF Clone Lentiviral Particle – RC222953L4V CYP27A1 (NM_000784) Human Tagged ORF Clone Lentiviral Particle – RC222953L4V	
Protein Pathways:	Metabolic pathways, PPAR signaling pathway, Primary bile acid biosynthesis
MW:	60.26 kDa
Gene Summary:	This gene encodes a member of the cytochrome P450 superfamily of enzymes. The cytochrome P450 proteins are monooxygenases which catalyze many reactions involved in drug metabolism and synthesis of cholesterol, steroids and other lipids. This mitochondrial protein oxidizes cholesterol intermediates as part of the bile synthesis pathway. Since the conversion of cholesterol to bile acids is the major route for removing cholesterol from the body, this protein is important for overall cholesterol homeostasis. Mutations in this gene cause cerebrotendinous xanthomatosis, a rare autosomal recessive lipid storage disease. [provided by RefSeq, Jul 2008]
