## ASS1 (NM\_000050) Human Tagged ORF Clone Lentiviral Particle

### **Product data:**

**Product Type:** Lentiviral Particles

**Product Name:** ASS1 (NM\_000050) Human Tagged ORF Clone Lentiviral Particle

Symbol: ASS<sup>\*</sup>

Synonyms: ASS; CTLN1

Mammalian Cell

Puromycin

NM 000050

Selection:

Vector:

ACCN:

pLenti-C-Myc-DDK-P2A-Puro (PS100092)

Tag: Myc-DDK

ORF Size: 1236 bp

**ORF Nucleotide** 

The ORF insert of this clone is exactly the same as(RC223189).

Sequence:

**OTI Disclaimer:** The molecular sequence of this clone aligns with the gene accession number as a point of

reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

**OTI Annotation:** This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

**RefSeg:** NM 000050.3

RefSeq Size: 1863 bp
RefSeq ORF: 1239 bp

Locus ID: 445

 UniProt ID:
 P00966

 Cytogenetics:
 9q34.11

Domains: Arginosuc\_synth

**Protein Families:** Druggable Genome

### ASS1 (NM\_000050) Human Tagged ORF Clone Lentiviral Particle - RC223189L3V

Protein Pathways: Alanine, aspartate and glutamate metabolism, Arginine and proline metabolism, Metabolic

pathways

**MW:** 46.5 kDa

**Gene Summary:** The protein encoded by this gene catalyzes the penultimate step of the arginine biosynthetic

pathway. There are approximately 10 to 14 copies of this gene including the pseudogenes scattered across the human genome, among which the one located on chromosome 9 appears to be the only functional gene for argininosuccinate synthetase. Mutations in the chromosome 9 copy of this gene cause citrullinemia. Two transcript variants encoding the

same protein have been found for this gene. [provided by RefSeq, Aug 2012]
