

Product datasheet for RC223407L2

USP37 (NM_020935) Human Tagged Lenti ORF Clone

Product data:

OriGene Technologies, Inc.

9620 Medical Center Drive, Ste 200 Rockville, MD 20850, US Phone: +1-888-267-4436 https://www.origene.com techsupport@origene.com EU: info-de@origene.com CN: techsupport@origene.cn

Product Type:	Expression Plasmids				
Product Name:	USP37 (NM_020935) Human Tagged Lenti ORF Clone				
Tag:	mGFP				
Symbol:	USP37				
Mammalian Cell Selection:	None				
Vector:	pLenti-C-mGFP (PS100071)				
E. coli Selection:	Chloramphenicol (34 ug/mL)				
ORF Nucleotide Sequence:	The ORF insert	of this clone	is exactl	y the sam	e as(RC223407).
Restriction Sites:	Sgfl-Mlul				
Cloning Scheme:		Cloning sites used for ORF Shi	uttling:		
		Sgf I GCG ATC GCC ATG	ORF <i>N</i>	11u I G CGT	
				Kozak Consensus	
	_	EcoRI BamHI	RBS	Sgf I	ORF

GRIGENE USP37	(NM_020935) Human Tagged Lenti ORF Clone – RC223407L2
OTI Disclaimer:	The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <u>More info</u>
OTI Annotation:	This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene.
Components:	The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).
Reconstitution Method:	 Centrifuge at 5,000xg for 5min. Carefully open the tube and add 100ul of sterile water to dissolve the DNA. Close the tube and incubate for 10 minutes at room temperature. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid at the bottom. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of shipping when stored at -20°C.
RefSeq:	<u>NM 020935.1</u>
RefSeq Size:	8015 bp
RefSeq ORF:	2940 bp
Locus ID:	57695
UniProt ID:	<u>Q86T82</u>
Cytogenetics:	2q35
Protein Families:	Protease
MW:	110 kDa
Gene Summary:	Deubiquitinase that antagonizes the anaphase-promoting complex (APC/C) during G1/S transition by mediating deubiquitination of cyclin-A (CCNA1 and CCNA2), thereby promoting S phase entry. Specifically mediates deubiquitination of 'Lys-11'-linked polyubiquitin chains, a specific ubiquitin-linkage type mediated by the APC/C complex. Also mediates deubiquitination of 'Lys-48'-linked polyubiquitin chains in vitro. Phosphorylation at Ser-628 during G1/S phase maximizes the deubiquitinase activity, leading to prevent degradation of cyclin-A (CCNA1 and CCNA2) (PubMed:21596315). Plays an important role in the regulation of DNA replication by stabilizing the licensing factor CDT1 (PubMed:27296872).
