

## Product datasheet for **RC223448L2V**

### **NRXN3 (NM\_004796) Human Tagged ORF Clone Lentiviral Particle**

#### **Product data:**

Product Type:	Lentiviral Particles
Product Name:	NRXN3 (NM_004796) Human Tagged ORF Clone Lentiviral Particle
Symbol:	NRXN3
Synonyms:	C14orf60
Mammalian Cell Selection:	None
Vector:	pLenti-C-mGFP (PS100071)
Tag:	mGFP
ACCN:	NM_004796
ORF Size:	3183 bp
ORF Nucleotide Sequence:	The ORF insert of this clone is exactly the same as(RC223448).
OTI Disclaimer:	The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <a href="#">More info</a>
OTI Annotation:	This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene.
RefSeq:	<a href="#">NM_004796.3</a>
RefSeq Size:	6148 bp
RefSeq ORF:	3186 bp
Locus ID:	9369
UniProt ID:	<a href="#">Q9Y4C0</a>
Cytogenetics:	14q24.3-q31.1
Domains:	LamG, EGF, EGF
Protein Families:	Druggable Genome, Transmembrane

**Protein Pathways:** Cell adhesion molecules (CAMs)

**MW:** 117.32 kDa

**Gene Summary:** This gene encodes a member of a family of proteins that function in the nervous system as receptors and cell adhesion molecules. Extensive alternative splicing and the use of alternative promoters results in multiple transcript variants and protein isoforms for this gene, but the full-length nature of many of these variants has not been determined. Transcripts that initiate from an upstream promoter encode alpha isoforms, which contain epidermal growth factor-like (EGF-like) sequences and laminin G domains. Transcripts initiating from the downstream promoter encode beta isoforms, which lack EGF-like sequences. Genetic variation at this locus has been associated with a range of behavioral phenotypes, including alcohol dependence and autism spectrum disorder. [provided by RefSeq, Dec 2012]
