VNN1 (NM_004666) Human Tagged Lenti ORF Clone

Product data:

Product Type: Expression Plasmids

Product Name: VNN1 (NM_004666) Human Tagged Lenti ORF Clone

Tag: Myc-DDK

Symbol: VNN1

Synonyms: HDLCQ8; Tiff66

Mammalian Cell None

Selection:

Vector:pLenti-C-Myc-DDK (PS100064)E. coli Selection:Chloramphenicol (34 ug/mL)

ORF Nucleotide

The ORF insert of this clone is exactly the same as(RC223462).

Sequence:

Restriction Sites: Sgfl-Mlul

Cloning Scheme:

^{*} The last codon before the Stop codon of the ORF.

ACCN: NM_004666

ORF Size: 1539 bp

VNN1 (NM_004666) Human Tagged Lenti ORF Clone - RC223462L1

OTI Disclaimer: The molecular sequence of this clone aligns with the gene accession number as a point of

reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

OTI Annotation: This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

Components: The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube

containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).

Reconstitution Method: 1. Centrifuge at 5,000xg for 5min.

2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.

3. Close the tube and incubate for 10 minutes at room temperature.

4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid

at the bottom.

5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of

shipping when stored at -20°C.

RefSeq: <u>NM 004666.1</u>, <u>NP 004657.1</u>

 RefSeq Size:
 3109 bp

 RefSeq ORF:
 1542 bp

 Locus ID:
 8876

 UniProt ID:
 095497

Cytogenetics: 6q23.2

Protein Pathways: Pantothenate and CoA biosynthesis

MW: 57.02 kDa

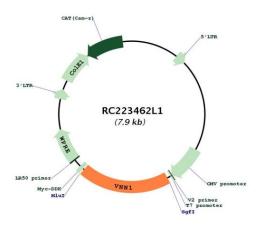

Gene Summary: This gene encodes a member of the vanin family of proteins, which share extensive sequence

similarity with each other, and also with biotinidase. The family includes secreted and membrane-associated proteins, a few of which have been reported to participate in hematopoietic cell trafficking. No biotinidase activity has been demonstrated for any of the vanin proteins, however, they possess pantetheinase activity, which may play a role in oxidative-stress response. This protein, like its mouse homolog, is likely a GPI-anchored cell surface molecule. The mouse protein is expressed by the perivascular thymic stromal cells and regulates migration of T-cell progenitors to the thymus. This gene lies in close proximity to, and in the same transcriptional orientation as, two other vanin genes on chromosome

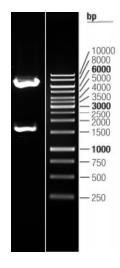

6q23-q24. [provided by RefSeq, Feb 2009]
