

Product datasheet for RC223824L3

IKZF3 (NM_183232) Human Tagged Lenti ORF Clone

Product data:

Product Type: Expression Plasmids

Product Name: IKZF3 (NM_183232) Human Tagged Lenti ORF Clone

Tag: Myc-DDK

Symbol: IKZF3

Synonyms: AIO; AIOLOS; ZNFN1A3

Mammalian Cell Puromycin

Selection:

Vector: pLenti-C-Myc-DDK-P2A-Puro (PS100092)

E. coli Selection: Chloramphenicol (34 ug/mL)

ORF Nucleotide The ORF insert of this clone is exactly the same as(RC223824).

Sequence:

Restriction Sites: Sgfl-Mlul

Cloning Scheme:

^{*} The last codon before the Stop codon of the ORF.

ACCN: NM_183232

ORF Size: 1293 bp

IKZF3 (NM_183232) Human Tagged Lenti ORF Clone - RC223824L3

OTI Disclaimer: The molecular sequence of this clone aligns with the gene accession number as a point of

reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

OTI Annotation: This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

Components: The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube

containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).

Reconstitution Method: 1. Centrifuge at 5,000xg for 5min.

2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.

3. Close the tube and incubate for 10 minutes at room temperature.

4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid

at the bottom.

5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of

shipping when stored at -20°C.

RefSeq: <u>NM 183232.1</u>

 RefSeq Size:
 2203 bp

 RefSeq ORF:
 1296 bp

 Locus ID:
 22806

 UniProt ID:
 Q9UKT9

Cytogenetics: 17q12-q21.1

MW: 48.9 kDa

Gene Summary: This gene encodes a member of the Ikaros family of zinc-finger proteins. Three members of

this protein family (Ikaros, Aiolos and Helios) are hematopoietic-specific transcription factors involved in the regulation of lymphocyte development. This gene product is a transcription factor that is important in the regulation of B lymphocyte proliferation and differentiation. Both Ikaros and Aiolos can participate in chromatin remodeling. Regulation of gene expression in B lymphocytes by Aiolos is complex as it appears to require the sequential

formation of Ikaros homodimers, Ikaros/Aiolos heterodimers, and Aiolos homodimers. Several alternative transcripts encoding different isoforms have been described, as well as

some non-protein coding variants. [provided by RefSeq, Apr 2012]
