NALP5 (NLRP5) (NM_153447) Human Tagged ORF Clone Lentiviral Particle – RC223877L2V

Gene Summary:The protein encoded by this gene belongs to the NALP protein family. Members of the NALP
protein family typically contain a NACHT domain, a NACHT-associated domain (NAD), a C-
terminal leucine-rich repeat (LRR) region, and an N-terminal pyrin domain (PYD). Expression
of this gene is restricted to the oocyte. A mouse gene that encodes a maternal oocyte protein,
similar to this encoded protein, is required for normal early embryogenesis. [provided by
RefSeq, Jul 2008]
