

Product datasheet for RC223964L4

ITPKB (NM_002221) Human Tagged Lenti ORF Clone

Product data:

Product Type: Expression Plasmids

Product Name: ITPKB (NM_002221) Human Tagged Lenti ORF Clone

Tag: mGFP Symbol: **ITPKB**

Synonyms: IP3-3KB; IP3K; IP3K-B; IP3KB; PIG37

Mammalian Cell Puromycin

Selection:

Vector: pLenti-C-mGFP-P2A-Puro (PS100093)

E. coli Selection: Chloramphenicol (34 ug/mL)

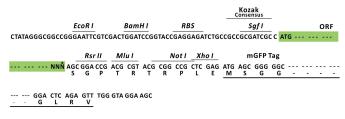

The ORF insert of this clone is exactly the same as(RC223964). **ORF Nucleotide**

Sequence:

Restriction Sites: Sgfl-RsrII

Cloning Scheme:

^{*} The last codon before the Stop codon of the ORF.

ACCN: NM_002221 **ORF Size:**

2838 bp

ITPKB (NM_002221) Human Tagged Lenti ORF Clone - RC223964L4

OTI Disclaimer: The molecular sequence of this clone aligns with the gene accession number as a point of

reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

OTI Annotation: This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

Components: The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube

containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).

Reconstitution Method: 1. Centrifuge at 5,000xg for 5min.

2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.

3. Close the tube and incubate for 10 minutes at room temperature.

4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid

at the bottom.

5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of

shipping when stored at -20°C.

RefSeq: <u>NM 002221.2</u>, <u>NP 002212.2</u>

1q42.12

 RefSeq Size:
 5875 bp

 RefSeq ORF:
 2841 bp

 Locus ID:
 3707

 UniProt ID:
 P27987

Cytogenetics:

Protein Families: Druggable Genome

Protein Pathways: Calcium signaling pathway, Inositol phosphate metabolism, Metabolic pathways,

Phosphatidylinositol signaling system

MW: 102.2 kDa

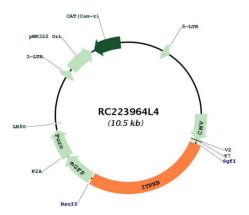

Gene Summary: The protein encoded by this protein regulates inositol phosphate metabolism by

phosphorylation of second messenger inositol 1,4,5-trisphosphate to Ins(1,3,4,5)P4. The activity of this encoded protein is responsible for regulating the levels of a large number of inositol polyphosphates that are important in cellular signaling. Both calcium/calmodulin and

protein phosphorylation mechanisms control its activity. [provided by RefSeq, Jul 2008]
