| Product Type:                | Expression Plasmids   |
|------------------------------|---|
| Product Name:                | NNT (NM_012343) Human Tagged Lenti ORF Clone  |
| Tag:                         | mGFP  |
| Symbol:                      | NNT   |
| Synonyms:                    | GCCD4   |
| Mammalian Cell<br>Selection: | None  |
| Vector:                      | pLenti-C-mGFP (PS100071)  |
| E. coli Selection:           | Chloramphenicol (34 ug/mL)  |
| ORF Nucleotide<br>Sequence:  | The ORF insert of this clone is exactly the same as(RC224002).                            |
| <b>Restriction Sites:</b>    | Sgfl-Mlul   |
| Cloning Scheme:              |   |
|                              | Cloning sites used for ORF Shuttling:   |
|                              | Sgf I         ORF         Mlu I            GCG ATC GCC         ATG // NNN         ACG CGT |
|                              |   |

ACCN: ORF Size: NM\_012343 3258 bp

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2023 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

| Service NNT (NM_012343) Human Tagged Lenti ORF Clone – RC224002L2 |  |
|---|--|
| OTI Disclaimer:   | The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <u>More info</u>                                  |
| OTI Annotation:   | This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene.   |
| Components:   | The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).   |
| Reconstitution Method:  | <ol> <li>Centrifuge at 5,000xg for 5min.</li> <li>Carefully open the tube and add 100ul of sterile water to dissolve the DNA.</li> <li>Close the tube and incubate for 10 minutes at room temperature.</li> <li>Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid at the bottom.</li> <li>Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of shipping when stored at -20°C.</li> </ol> |
| RefSeq:   | <u>NM 012343.2</u>   |
| RefSeq Size:  | 4600 bp  |
| RefSeq ORF:   | 3261 bp  |
| Locus ID:   | 23530  |
| UniProt ID:   | <u>Q13423</u>  |
| Cytogenetics:   | 5p12   |
| Domains:  | PNTB, AlaDh_PNT_C, AlaDh_PNT_N   |
| Protein Families:   | Transmembrane  |
| Protein Pathways:   | Metabolic pathways, Nicotinate and nicotinamide metabolism   |
| MW:   | 113.7 kDa  |
| Gene Summary:   | This gene encodes an integral protein of the inner mitochondrial membrane. The enzyme couples hydride transfer between NAD(H) and NADP(+) to proton translocation across the inner mitochondrial membrane. Under most physiological conditions, the enzyme uses energy from the mitochondrial proton gradient to produce high concentrations of NADPH. The resulting NADPH is used for biosynthesis and in free radical detoxification. [provided by                       |
