Product datasheet for RC224336L2V

Sumo 2 (SUMO2) (NM_006937) Human Tagged ORF Clone Lentiviral Particle

Product data:

Product Type:	Lentiviral Particles
Product Name:	Sumo 2 (SUMO2) (NM_006937) Human Tagged ORF Clone Lentiviral Particle
Symbol:	Sumo 2
Synonyms:	HSMT3; Smt3A; SMT3B; SMT3H2; SUMO3
Mammalian Cell Selection:	None
Vector:	pLenti-C-mGFP (PS100071)
Tag:	mGFP
ACCN:	NM_006937
ORF Size:	285 bp
ORF Nucleotide Sequence:	The ORF insert of this clone is exactly the same as(RC224336).
OTI Disclaimer:	The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <u>More info</u>
OTI Annotation:	This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene.
RefSeq:	<u>NM 006937.3</u>
RefSeq Size:	1066 bp
RefSeq ORF:	288 bp
Locus ID:	6613
UniProt ID:	<u>P61956</u>
Cytogenetics:	17q25.1
Domains:	UBQ
Protein Families:	Druggable Genome

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2023 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

	Sumo 2 (SUMO2) (NM_006937) Human Tagged ORF Clone Lentiviral Particle – RC224336L2V
MW:	10.7 kDa
Gene Summary:	This gene encodes a protein that is a member of the SUMO (small ubiquitin-like modifier) protein family. It functions in a manner similar to ubiquitin in that it is bound to target proteins as part of a post-translational modification system. However, unlike ubiquitin which targets proteins for degradation, this protein is involved in a variety of cellular processes, such as nuclear transport, transcriptional regulation, apoptosis, and protein stability. It is not active until the last two amino acids of the carboxy-terminus have been cleaved off. Numerous pseudogenes have been reported for this gene. Alternate transcriptional splice variants, encoding different isoforms, have been characterized. [provided by RefSeq, Jul 2008]
