## VEGF Receptor 1 (FLT1) (NM\_002019) Human Tagged Lenti ORF Clone

#### **Product data:**

**Product Type:** Expression Plasmids

**Product Name:** VEGF Receptor 1 (FLT1) (NM\_002019) Human Tagged Lenti ORF Clone

Tag: mGFP

Symbol: VEGF Receptor 1

**Synonyms:** FLT; FLT-1; VEGFR-1; VEGFR1

Mammalian Cell None

Selection:

**Vector:** pLenti-C-mGFP (PS100071)

**E. coli Selection:** Chloramphenicol (34 ug/mL)

**ORF Nucleotide** 

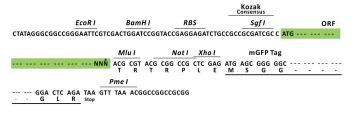

The ORF insert of this clone is exactly the same as(RC224406).

Sequence:

**Restriction Sites:** Sgfl-Mlul

**Cloning Scheme:** 

<sup>\*</sup> The last codon before the Stop codon of the ORF.

**ACCN:** NM\_002019

ORF Size: 4014 bp

### VEGF Receptor 1 (FLT1) (NM\_002019) Human Tagged Lenti ORF Clone - RC224406L2

**OTI Disclaimer:** The molecular sequence of this clone aligns with the gene accession number as a point of

reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

**OTI Annotation:** This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

**Components:** The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube

containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).

**Reconstitution Method:** 1. Centrifuge at 5,000xg for 5min.

2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.

3. Close the tube and incubate for 10 minutes at room temperature.

4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid

at the bottom.

5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of

shipping when stored at -20°C.

RefSeq: <u>NM 002019.2</u>, <u>NP 002010.2</u>

RefSeq Size: 5777 bp
RefSeq ORF: 4017 bp
Locus ID: 2321

UniProt ID: P17948
Cytogenetics: 13q12.3

**Domains:** pkinase, TyrKc, S TKc, ig, IGv, IGc2, IG

**Protein Families:** Druggable Genome, Protein Kinase, Secreted Protein

**Protein Pathways:** Cytokine-cytokine receptor interaction, Endocytosis, Focal adhesion

MW: 150.77 kDa

**Gene Summary:** This gene encodes a member of the vascular endothelial growth factor receptor (VEGFR)

family. VEGFR family members are receptor tyrosine kinases (RTKs) which contain an extracellular ligand-binding region with seven immunoglobulin (Ig)-like domains, a

transmembrane segment, and a tyrosine kinase (TK) domain within the cytoplasmic domain. This protein binds to VEGFR-A, VEGFR-B and placental growth factor and plays an important role in angiogenesis and vasculogenesis. Expression of this receptor is found in vascular endothelial cells, placental trophoblast cells and peripheral blood monocytes. Multiple transcript variants encoding different isoforms have been found for this gene. Isoforms include a full-length transmembrane receptor isoform and shortened, soluble isoforms. The soluble isoforms are associated with the onset of pre-eclampsia.[provided by RefSeq, May

2009]
