Product datasheet for RC224529L1V

Retinoic Acid Receptor beta (RARB) (NM_000965) Human Tagged ORF Clone Lentiviral Particle

Product data:

Product Type:	Lentiviral Particles
Product Name:	Retinoic Acid Receptor beta (RARB) (NM_000965) Human Tagged ORF Clone Lentiviral Particle
Symbol:	Retinoic Acid Receptor beta
Synonyms:	HAP; MCOPS12; NR1B2; RARbeta1; RRB2
Mammalian Cell Selection:	None
Vector:	pLenti-C-Myc-DDK (PS100064)
Tag:	Myc-DDK
ACCN:	NM_000965
ORF Size:	1344 bp
ORF Nucleotide Sequence:	The ORF insert of this clone is exactly the same as(RC224529).
OTI Disclaimer:	The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <u>More info</u>
OTI Annotation:	This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene.
RefSeq:	<u>NM 000965.2</u>
RefSeq Size:	3222 bp
RefSeq ORF:	1347 bp
Locus ID:	5915
UniProt ID:	<u>P10826</u>
Cytogenetics:	3p24.2
Domains:	HOLI, zf-C4

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2023 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

	Retinoic Acid Receptor beta (RARB) (NM_000965) Human Tagged ORF Clone Lentiviral Parti RC224529L1V	icle –
Protein Families	Druggable Genome, Nuclear Hormone Receptor, Transcription Factors	
Protein Pathway	Non-small cell lung cancer, Pathways in cancer, Small cell lung cancer	
MW:	50.3 kDa	
Gene Summary:	This gene encodes retinoic acid receptor beta, a member of the thyroid-steroid hormor receptor superfamily of nuclear transcriptional regulators. This receptor localizes to the cytoplasm and to subnuclear compartments. It binds retinoic acid, the biologically activ of vitamin A which mediates cellular signalling in embryonic morphogenesis, cell growt differentiation. It is thought that this protein limits growth of many cell types by regulat gene expression. The gene was first identified in a hepatocellular carcinoma where it fla hepatitis B virus integration site. Alternate promoter usage and differential splicing resu multiple transcript variants. [provided by RefSeq, Mar 2014]	e ve form th and ting lanks a
