| OTI Disclaimer:              | The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <u>More info</u> |
| OTI Annotation:              | This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene.  |

| Gene Summary:    | This gene is a member of the protein-tyrosine kinase oncogene family. It encodes a<br>membrane-associated tyrosine kinase that has been implicated in the control of cell growth.<br>The protein associates with the p85 subunit of phosphatidylinositol 3-kinase and interacts<br>with the fyn-binding protein. Alternatively spliced transcript variants encoding distinct<br>isoforms exist. [provided by RefSeq, Jul 2008] |
