# Product datasheet for RC224818L2V

## ENPP3 (NM\_005021) Human Tagged ORF Clone Lentiviral Particle

### **Product data:**

Product Type:	Lentiviral Particles
Product Name:	ENPP3 (NM_005021) Human Tagged ORF Clone Lentiviral Particle
Symbol:	ENPP3
Synonyms:	B10; CD203c; NPP3; PD-IBETA; PDNP3
Mammalian Cell Selection:	None
Vector:	pLenti-C-mGFP (PS100071)
Tag:	mGFP
ACCN:	NM_005021
ORF Size:	2625 bp
ORF Nucleotide Sequence:	The ORF insert of this clone is exactly the same as(RC224818).
OTI Disclaimer:	The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <u>More info</u>
OTI Annotation:	This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene.
RefSeq:	<u>NM 005021.2</u>
RefSeq Size:	2794 bp
RefSeq ORF:	2628 bp
Locus ID:	5169
UniProt ID:	<u>014638</u>
Cytogenetics:	6q23.2
Domains:	SO, Endonuclease, Phosphodiest
Protein Families:	Druggable Genome, Transmembrane

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2022 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US Protein Pathways:Metabolic pathways, Nicotinate and nicotinamide metabolism, Pantothenate and CoA<br/>biosynthesis, Purine metabolism, Riboflavin metabolism, Starch and sucrose metabolism

#### 99.9 kDa

MW:

Gene Summary:The protein encoded by this gene belongs to a series of ectoenzymes that are involved in<br/>hydrolysis of extracellular nucleotides. These ectoenzymes possess ATPase and ATP<br/>pyrophosphatase activities and are type II transmembrane proteins. Expression of the related<br/>rat mRNA has been found in a subset of immature glial cells and in the alimentary tract. The<br/>corresponding rat protein has been detected in the pancreas, small intestine, colon, and liver.<br/>The human mRNA is expressed in glioma cells, prostate, and uterus. Expression of the<br/>human protein has been detected in uterus, basophils, and mast cells. Two transcript<br/>variants, one protein coding and the other non-protein coding, have been found for this gene.<br/>[provided by RefSeq, Oct 2015]
