

# Product datasheet for RC224973L1

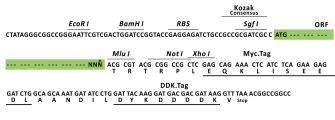

## CDC23 (NM\_004661) Human Tagged Lenti ORF Clone

### **Product data:**

#### OriGene Technologies, Inc.

9620 Medical Center Drive, Ste 200 Rockville, MD 20850, US Phone: +1-888-267-4436 https://www.origene.com techsupport@origene.com EU: info-de@origene.com CN: techsupport@origene.cn

| Expression Plasmids  |
|--|
| CDC23 (NM_004661) Human Tagged Lenti ORF Clone   |
| Myc-DDK  |
| CDC23  |
| ANAPC8; APC8; CUT23  |
| None   |
| pLenti-C-Myc-DDK (PS100064)  |
| Chloramphenicol (34 ug/mL)   |
| The ORF insert of this clone is exactly the same as(RC224973).                                   |
| Sgfl-Mlul  |
|  |
| Cloning sites used for ORF Shuttling:  |
| Sgf I         ORF         Mlu I            GCG ATC GC         ATG //         NNN         ACG CGT |
|  |

\* The last codon before the Stop codon of the ORF.

ACCN: ORF Size: NM\_004661 1791 bp

| ORIGENE CDC23          | (NM_004661) Human Tagged Lenti ORF Clone – RC224973L1  |
|------------------------|--|
| OTI Disclaimer:        | The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <u>More info</u>  |
| OTI Annotation:        | This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene.   |
| Components:            | The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).   |
| Reconstitution Method: | <ol> <li>Centrifuge at 5,000xg for 5min.</li> <li>Carefully open the tube and add 100ul of sterile water to dissolve the DNA.</li> <li>Close the tube and incubate for 10 minutes at room temperature.</li> <li>Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid at the bottom.</li> <li>Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of shipping when stored at -20°C.</li> </ol>   |
| RefSeq:                | <u>NM 004661.3</u>   |
| RefSeq Size:           | 3169 bp  |
| RefSeq ORF:            | 1794 bp  |
| Locus ID:              | 8697   |
| UniProt ID:            | <u>Q9UJX2</u>  |
| Cytogenetics:          | 5q31.2   |
| Domains:               | TPR, APC8  |
| Protein Families:      | Druggable Genome   |
| Protein Pathways:      | Cell cycle, Oocyte meiosis, Progesterone-mediated oocyte maturation, Ubiquitin mediated proteolysis  |
| MW:                    | 68.7 kDa   |
| Gene Summary:          | The protein encoded by this gene shares strong similarity with Saccharomyces cerevisiae<br>Cdc23, a protein essential for cell cycle progression through the G2/M transition. This protein<br>is a component of anaphase-promoting complex (APC), which is composed of eight protein<br>subunits and highly conserved in eukaryotic cells. APC catalyzes the formation of cyclin B-<br>ubiquitin conjugate that is responsible for the ubiquitin-mediated proteolysis of B-type<br>cyclins. This protein and 3 other members of the APC complex contain the TPR<br>(tetratricopeptide repeat), a protein domain important for protein-protein interaction.<br>[provided by RefSeq, Jul 2008] |
