

Product datasheet for RC224973L2V

OriGene Technologies, Inc.

9620 Medical Center Drive, Ste 200 Rockville, MD 20850, US Phone: +1-888-267-4436 https://www.origene.com techsupport@origene.com EU: info-de@origene.com CN: techsupport@origene.cn

CDC23 (NM_004661) Human Tagged ORF Clone Lentiviral Particle

Product data:

Product Type: Lentiviral Particles

Product Name: CDC23 (NM_004661) Human Tagged ORF Clone Lentiviral Particle

Symbol: CDC23

Synonyms: ANAPC8; APC8; CUT23

Mammalian Cell

Selection:

None

Vector: pLenti-C-mGFP (PS100071)

Tag: mGFP

ACCN: NM_004661 **ORF Size:** 1791 bp

ORF Nucleotide

OTI Disclaimer:

The Of

Sequence:

The ORF insert of this clone is exactly the same as(RC224973).

The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

OTI Annotation: This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

RefSeg: NM 004661.3

 RefSeq Size:
 3169 bp

 RefSeq ORF:
 1794 bp

 Locus ID:
 8697

 UniProt ID:
 Q9UIX2

 Cytogenetics:
 5q31.2

Domains: TPR, APC8

Protein Families: Druggable Genome

CDC23 (NM_004661) Human Tagged ORF Clone Lentiviral Particle - RC224973L2V

Protein Pathways: Cell cycle, Oocyte meiosis, Progesterone-mediated oocyte maturation, Ubiquitin mediated

proteolysis

MW: 68.7 kDa

Gene Summary: The protein encoded by this gene shares strong similarity with Saccharomyces cerevisiae

Cdc23, a protein essential for cell cycle progression through the G2/M transition. This protein is a component of anaphase-promoting complex (APC), which is composed of eight protein subunits and highly conserved in eukaryotic cells. APC catalyzes the formation of cyclin B-ubiquitin conjugate that is responsible for the ubiquitin-mediated proteolysis of B-type

cyclins. This protein and 3 other members of the APC complex contain the TPR

(tetratricopeptide repeat), a protein domain important for protein-protein interaction.
