## Product datasheet for RC225000L3V

## SRP9 (NM\_001130440) Human Tagged ORF Clone Lentiviral Particle

## **Product data:**

| Product Type:                | Lentiviral Particles  |
|------------------------------|---|
| Product Name:                | SRP9 (NM_001130440) Human Tagged ORF Clone Lentiviral Particle  |
| Symbol:                      | SRP9  |
| Synonyms:                    | ALURBP  |
| Mammalian Cell<br>Selection: | Puromycin   |
| Vector:                      | pLenti-C-Myc-DDK-P2A-Puro (PS100092)  |
| Tag:                         | Myc-DDK   |
| ACCN:                        | NM_001130440  |
| ORF Size:                    | 246 bp  |
| ORF Nucleotide<br>Sequence:  | The ORF insert of this clone is exactly the same as(RC225000).  |
| OTI Disclaimer:              | The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <u>More info</u> |
| OTI Annotation:              | This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene.  |
| RefSeq:                      | <u>NM 001130440.1, NP 001123912.1</u>   |
| RefSeq ORF:                  | 249 bp  |
| Locus ID:                    | 6726  |
| UniProt ID:                  | <u>P49458</u>   |
| Cytogenetics:                | 1q42.12   |
| Protein Families:            | Druggable Genome  |
| Protein Pathways:            | Protein export  |
| MW:                          | 8.9 kDa   |

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2022 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

Gene Summary:Signal-recognition-particle assembly has a crucial role in targeting secretory proteins to the<br/>rough endoplasmic reticulum membrane. SRP9 together with SRP14 and the Alu portion of<br/>the SRP RNA, constitutes the elongation arrest domain of SRP. The complex of SRP9 and<br/>SRP14 is required for SRP RNA binding.[UniProtKB/Swiss-Prot Function]
