Netrin G1 (NTNG1) (NM_001113228) Human Tagged ORF Clone Lentiviral Particle - RC225813L4V

Gene Summary: This gene encodes a preproprotein that is processed into a secreted protein containing eukaroytic growth factor (EGF)-like domains. This protein acts to guide axon growth during neuronal development. Polymorphisms in this gene may be associated with schizophrenia. Alternative splicing results in multiple transcript variants encoding distinct isoforms. [provided by RefSeq, Aug 2015]
