## Product datasheet for RC226159L1V

## Tau (MAPT) (NM\_001123066) Human Tagged ORF Clone Lentiviral Particle

## **Product data:**

Product Type:	Lentiviral Particles
Product Name:	Tau (MAPT) (NM_001123066) Human Tagged ORF Clone Lentiviral Particle
Symbol:	МАРТ
Synonyms:	DDPAC; FTDP-17; MAPTL; MSTD; MTBT1; MTBT2; PPND; PPP1R103; TAU; tau-40
Mammalian Cell Selection:	None
Vector:	pLenti-C-Myc-DDK (PS100064)
Tag:	Myc-DDK
ACCN:	NM_001123066
ORF Size:	2328 bp
ORF Nucleotide Sequence:	The ORF insert of this clone is exactly the same as(RC226159).
OTI Disclaimer:	The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <u>More info</u>
OTI Annotation:	This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene.
RefSeq:	<u>NM 001123066.2, NP 001116538.1</u>
RefSeq ORF:	2331 bp
Locus ID:	4137
UniProt ID:	<u>P10636</u>
Cytogenetics:	17q21.31
Protein Families:	Druggable Genome
Protein Pathways:	Alzheimer's disease, MAPK signaling pathway
MW:	80.7 kDa

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2022 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

Gene Summary:This gene encodes the microtubule-associated protein tau (MAPT) whose transcript<br/>undergoes complex, regulated alternative splicing, giving rise to several mRNA species. MAPT<br/>transcripts are differentially expressed in the nervous system, depending on stage of<br/>neuronal maturation and neuron type. MAPT gene mutations have been associated with<br/>several neurodegenerative disorders such as Alzheimer's disease, Pick's disease,<br/>frontotemporal dementia, cortico-basal degeneration and progressive supranuclear palsy.<br/>[provided by RefSeq, Jul 2008]
