

Product datasheet for RC226227L4

Floudet datasilest for RG22022/L4

Sulfatase 1 (SULF1) (NM_001128204) Human Tagged Lenti ORF Clone

Product data:

Product Type: Expression Plasmids

Tag: mGFP

Symbol: Sulfatase 1

Synonyms: SULF-1

Mammalian Cell Puromycin

Selection:

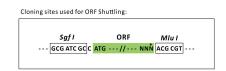

Vector: pLenti-C-mGFP-P2A-Puro (PS100093)

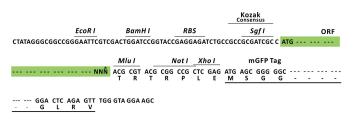

E. coli Selection: Chloramphenicol (34 ug/mL)

ORF Nucleotide Sequence: The ORF insert of this clone is exactly the same as(RC226227).

Restriction Sites: Sgfl-Mlul

Cloning Scheme:

st The last codon before the Stop codon of the ORF.

ACCN: NM_001128204

ORF Size: 2613 bp

Sulfatase 1 (SULF1) (NM_001128204) Human Tagged Lenti ORF Clone | RC226227L4

OTI Disclaimer: The molecular sequence of this clone aligns with the gene accession number as a point of

reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

OTI Annotation: This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

Components: The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube

containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).

Reconstitution Method: 1. Centrifuge at 5,000xg for 5min.

2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.

3. Close the tube and incubate for 10 minutes at room temperature.

4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid

at the bottom.

5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of

shipping when stored at -20°C.

Note: Plasmids are not sterile. For experiments where strict sterility is required, filtration with 0.22um

filter is required.

RefSeq: <u>NM_001128204.1</u>

RefSeq ORF: 2616 bp

Locus ID: 23213

UniProt ID: Q8IWU6

Cytogenetics: 8q13.2-q13.3

Protein Families: Druggable Genome

MW: 100.8 kDa

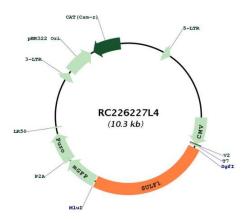

Gene Summary: This gene encodes an extracellular heparan sulfate endosulfatase. The encoded enzyme

selectively removes 6-O-sulfate groups from heparan sulfate chains of heparan sulfate proteoglycans (HSPGs). The enzyme is secreted through the Golgi and is subsequently localized to the cell surface. The expression of this gene may be down-regulated in several types of cancer, including hepatocellular (HCC), ovarian and breast cancers. Alternative

splicing results in multiple transcript variants. [provided by RefSeq, Aug 2013]
