## CrkRS (CDK12) (NM\_015083) Human Tagged Lenti ORF Clone

#### **Product data:**

**Product Type:** Expression Plasmids

Product Name: CrkRS (CDK12) (NM\_015083) Human Tagged Lenti ORF Clone

Tag: mGFP Symbol: CrkRS

Synonyms: CRK7; CRKR; CRKRS

Mammalian Cell Puromycin

Selection:

**Vector:** pLenti-C-mGFP-P2A-Puro (PS100093)

Ascl-Mlul

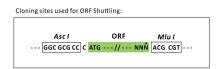

E. coli Selection: Chloramphenicol (34 ug/mL)

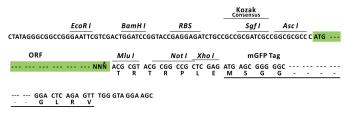

ORF Nucleotide The ORF insert of this clone is exactly the same as(RC226399).

Sequence:

ce:

Restriction Sites: Cloning Scheme:

<sup>\*</sup> The last codon before the Stop codon of the ORF.

**ACCN:** NM\_015083

ORF Size: 4443 bp

## CrkRS (CDK12) (NM\_015083) Human Tagged Lenti ORF Clone - RC226399L4

**OTI Disclaimer:** The molecular sequence of this clone aligns with the gene accession number as a point of

reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

**OTI Annotation:** This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

**Components:** The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube

containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).

**Reconstitution Method:** 1. Centrifuge at 5,000xg for 5min.

2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.

3. Close the tube and incubate for 10 minutes at room temperature.

4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid

at the bottom.

5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of

shipping when stored at -20°C.

**RefSeq:** <u>NM 015083.1</u>

 RefSeq ORF:
 4446 bp

 Locus ID:
 51755

UniProt ID: Q9NYV4

Cytogenetics: 17q12

**Protein Families:** Druggable Genome, Protein Kinase

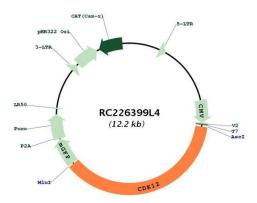

**MW:** 163 kDa

**Gene Summary:** Cyclin-dependent kinase that phosphorylates the C-terminal domain (CTD) of the large

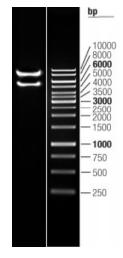

subunit of RNA polymerase II (POLR2A), thereby acting as a key regulator of transcription elongation. Regulates the expression of genes involved in DNA repair and is required for the maintenance of genomic stability. Preferentially phosphorylates 'Ser-5' in CTD repeats that are already phosphorylated at 'Ser-7', but can also phosphorylate 'Ser-2'. Required for RNA splicing, possibly by phosphorylating SRSF1/SF2. Involved in regulation of MAP kinase activity, possibly leading to affect the response to estrogen inhibitors.[UniProtKB/Swiss-Prot Function]
