SGK1 (NM_001143676) Human Tagged ORF Clone Lentiviral Particle

Product data:

Product Type: Lentiviral Particles

Product Name: SGK1 (NM_001143676) Human Tagged ORF Clone Lentiviral Particle

Symbol: SGK1
Synonyms: SGK

Mammalian Cell Puromycin

Selection:

Vector:

pLenti-C-Myc-DDK-P2A-Puro (PS100092)

Tag: Myc-DDK

ACCN: NM_001143676

ORF Size: 1578 bp

ORF Nucleotide

The ORF insert of this clone is exactly the same as(RC226554).

OTI Disclaimer:

Sequence:

The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

OTI Annotation: This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

RefSeq: NM 001143676.1, NP 001137148.1

 RefSeq ORF:
 1581 bp

 Locus ID:
 6446

 UniProt ID:
 000141

 Cytogenetics:
 6q23.2

Protein Families: Druggable Genome, Protein Kinase

MW: 59.7 kDa

Gene Summary:

This gene encodes a serine/threonine protein kinase that plays an important role in cellular stress response. This kinase activates certain potassium, sodium, and chloride channels, suggesting an involvement in the regulation of processes such as cell survival, neuronal excitability, and renal sodium excretion. High levels of expression of this gene may contribute to conditions such as hypertension and diabetic nephropathy. Several alternatively spliced transcript variants encoding different isoforms have been noted for this gene. [provided by RefSeq, Jan 2009]
