Product datasheet for RC226563

Mortality Factor 4 like 2 (MORF4L2) (NM_001142419) Human Tagged ORF Clone

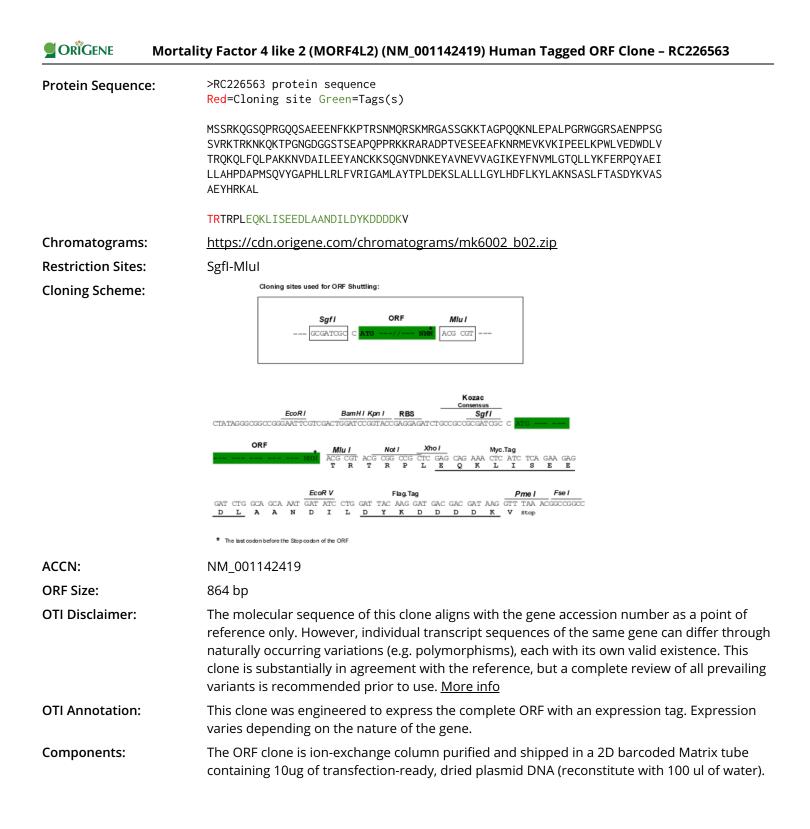

Product data:

| Product Type: | Expression Plasmids |
|------------------------------|---|
| Product Name: | Mortality Factor 4 like 2 (MORF4L2) (NM_001142419) Human Tagged ORF Clone |
| Tag: | Myc-DDK |
| Symbol: | Mortality Factor 4 like 2 |
| Synonyms: | MORFL2; MRGX |
| Mammalian Cell Selection: | Neomycin |
| Vector: | pCMV6-Entry (PS100001) |
| E. coli Selection: | Kanamycin (25 ug/mL) |
| ORF Nucleotide Sequence: | <pre>>RC226563 ORF sequence Red=Cloning site Blue=ORF Green=Tags(s)</pre> |

Mortality Factor 4 like 2 (MORF4L2) (NM_001142419) Human Tagged ORF Clone - RC226563 **Reconstitution Method:** 1. Centrifuge at 5,000xg for 5min. 2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA. 3. Close the tube and incubate for 10 minutes at room temperature. 4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid at the bottom. 5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of shipping when stored at -20°C. NM 001142419.1, NP 001135891.1 RefSeq: **RefSeq Size:** 1980 bp **RefSeq ORF:** 867 bp Locus ID: 9643 **UniProt ID:** B3KP92 Cytogenetics: Xq22.2 **Protein Families: Transcription Factors** MW: 32.3 kDa Gene Summary: Component of the NuA4 histone acetyltransferase complex which is involved in transcriptional activation of select genes principally by acetylation of nucleosomal histone H4 and H2A. This modification may both alter nucleosome - DNA interactions and promote interaction of the modified histones with other proteins which positively regulate transcription. This complex may be required for the activation of transcriptional programs

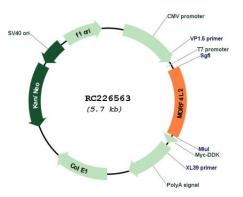

> associated with oncogene and proto-oncogene mediated growth induction, tumor suppressor mediated growth arrest and replicative senescence, apoptosis, and DNA repair. The NuA4 complex ATPase and helicase activities seem to be, at least in part, contributed by the association of RUVBL1 and RUVBL2 with EP400. NuA4 may also play a direct role in DNA repair when directly recruited to sites of DNA damage. Also component of the MSIN3A complex which acts to repress transcription by deacetylation of nucleosomal histones.

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2023 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

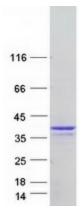

[UniProtKB/Swiss-Prot Function]

Circular map for RC226563

Coomassie blue staining of purified MORF4L2 protein (Cat# [TP326563]). The protein was produced from HEK293T cells transfected with MORF4L2 cDNA clone (Cat# RC226563) using MegaTran 2.0 (Cat# [TT210002]).
