## Apolipoprotein L 1 (APOL1) (NM\_001136540) Human Tagged Lenti ORF Clone

**Product data:** 

**Product Type:** Expression Plasmids

**Product Name:** Apolipoprotein L 1 (APOL1) (NM\_001136540) Human Tagged Lenti ORF Clone

Tag: Myc-DDK

Symbol: Apolipoprotein L 1

Synonyms: APO-L; APOL; APOL-I; FSGS4

Mammalian Cell

Selection:

Puromycin

**Vector:** pLenti-C-Myc-DDK-P2A-Puro (PS100092)

E. coli Selection: Chloramphenicol (34 ug/mL)

**ORF Nucleotide** 

The ORF insert of this clone is exactly the same as(RC226566).

Sequence:

**Restriction Sites:** Sgfl-Mlul

**Cloning Scheme:** 

<sup>\*</sup> The last codon before the Stop codon of the ORF.

**ACCN:** NM\_001136540

ORF Size: 1194 bp

## Apolipoprotein L 1 (APOL1) (NM\_001136540) Human Tagged Lenti ORF Clone - RC226566L3

**OTI Disclaimer:** The molecular sequence of this clone aligns with the gene accession number as a point of

reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

**OTI Annotation:** This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

**Components:** The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube

containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).

**Reconstitution Method:** 1. Centrifuge at 5,000xg for 5min.

2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.

3. Close the tube and incubate for 10 minutes at room temperature.

4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid

at the bottom.

5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of

shipping when stored at -20°C.

RefSeq: <u>NM 001136540.1</u>, <u>NP 001130012.1</u>

 RefSeq Size:
 2924 bp

 RefSeq ORF:
 1197 bp

 Locus ID:
 8542

 UniProt ID:
 014791

**Protein Families:** Secreted Protein, Transmembrane

22q12.3

MW: 43.9 kDa

Cytogenetics:

**Gene Summary:** This gene encodes a secreted high density lipoprotein which binds to apolipoprotein A-I.

Apolipoprotein A-I is a relatively abundant plasma protein and is the major apoprotein of HDL. It is involved in the formation of most cholesteryl esters in plasma and also promotes efflux of cholesterol from cells. This apolipoprotein L family member may play a role in lipid exchange and transport throughout the body, as well as in reverse cholesterol transport from peripheral cells to the liver. Several different transcript variants encoding different isoforms

have been found for this gene. [provided by RefSeq, Nov 2008]
