Product datasheet for RC226644L4V

Apolipoprotein L 1 (APOL1) (NM_001136541) Human Tagged ORF Clone Lentiviral Particle

Product data:

Product Type:	Lentiviral Particles
Product Name:	Apolipoprotein L 1 (APOL1) (NM_001136541) Human Tagged ORF Clone Lentiviral Particle
Symbol:	APOL1
Synonyms:	APO-L; APOL; APOL-I; FSGS4
Mammalian Cell Selection:	Puromycin
Vector:	pLenti-C-mGFP-P2A-Puro (PS100093)
Tag:	mGFP
ACCN:	NM_001136541
ORF Size:	1140 bp
ORF Nucleotide Sequence:	The ORF insert of this clone is exactly the same as(RC226644).
OTI Disclaimer:	The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <u>More info</u>
OTI Annotation:	This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene.
RefSeq:	<u>NM 001136541.1, NP 001130013.1</u>
RefSeq ORF:	1143 bp
Locus ID:	8542
UniProt ID:	<u>014791</u>
Cytogenetics:	22q12.3
Protein Families:	Secreted Protein, Transmembrane
MW:	42 kDa

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2022 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

Gene Summary:This gene encodes a secreted high density lipoprotein which binds to apolipoprotein A-I.
Apolipoprotein A-I is a relatively abundant plasma protein and is the major apoprotein of
HDL. It is involved in the formation of most cholesteryl esters in plasma and also promotes
efflux of cholesterol from cells. This apolipoprotein L family member may play a role in lipid
exchange and transport throughout the body, as well as in reverse cholesterol transport from
peripheral cells to the liver. Several different transcript variants encoding different isoforms
have been found for this gene. [provided by RefSeq, Nov 2008]
