Carboxylesterase 7 (CES5A) (NM_001143685) Human Tagged ORF Clone Lentiviral Particle

Product data:

Product Type: Lentiviral Particles

Product Name: Carboxylesterase 7 (CES5A) (NM 001143685) Human Tagged ORF Clone Lentiviral Particle

Symbol: Carboxylesterase 7

Synonyms: CAUXIN; CES4C1; CES5; CES7; HEL126

Mammalian Cell

Selection:

Puromycin

Vector: pLenti-C-mGFP-P2A-Puro (PS100093)

Tag: mGFP

ACCN: NM_001143685

ORF Size: 1725 bp

ORF Nucleotide

Sequence:

Cytogenetics:

The ORF insert of this clone is exactly the same as(RC226746).

OTI Disclaimer: The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This

clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

OTI Annotation: This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

RefSeq: NM 001143685.1, NP 001137157.1

 RefSeq ORF:
 1728 bp

 Locus ID:
 221223

 UniProt ID:
 Q6NT32

Protein Families: Druggable Genome

Protein Pathways: Drug metabolism - other enzymes

16q12.2

MW: 63.7 kDa

Carboxylesterase 7 (CES5A) (NM_001143685) Human Tagged ORF Clone Lentiviral Particle – RC226746L4V

Gene Summary:

This gene encodes a member of the carboxylesterase large family. The family members are responsible for the hydrolysis or transesterification of various xenobiotics, such as cocaine and heroin, and endogenous substrates with ester, thioester, or amide bonds. They also participate in fatty acyl and cholesterol ester metabolism, and may play a role in the bloodbrain barrier system. This gene, also called CES5, is predominantly expressed in peripheral tissues, including brain, kidney, lung and testis. It encodes a secreted enzyme. Because of high levels in the urine of male domestic cats, this enzyme is also called cauxin (carboxylesterase-like urinary excreted protein). The enzyme functions in regulating the production of a pheromone precursor and may contribute to lipid and cholesterol transfer processes within male reproductive fluids. Multiple transcript variants encoding different isoforms have been found for this gene. [provided by RefSeq, Jun 2010]
