# Product datasheet for RC226760L4V

### RNF185 (NM\_001135825) Human Tagged ORF Clone Lentiviral Particle

## **Product data:**

Product Type:	Lentiviral Particles
Product Name:	RNF185 (NM_001135825) Human Tagged ORF Clone Lentiviral Particle
Symbol:	RNF185
Mammalian Cell Selection:	Puromycin
Vector:	pLenti-C-mGFP-P2A-Puro (PS100093)
Tag:	mGFP
ACCN:	NM_001135825
ORF Size:	408 bp
ORF Nucleotide Sequence:	The ORF insert of this clone is exactly the same as(RC226760).
OTI Disclaimer:	The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <u>More info</u>
OTI Annotation:	This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene.
RefSeq:	<u>NM 001135825.1</u>
RefSeq ORF:	411 bp
Locus ID:	91445
UniProt ID:	<u>Q96GF1</u>
Cytogenetics:	22q12.2
Protein Families:	Druggable Genome, Transmembrane
MW:	14 kDa

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2022 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

#### RNF185 (NM\_001135825) Human Tagged ORF Clone Lentiviral Particle – RC226760L4V

Gene Summary:E3 ubiquitin-protein ligase that regulates selective mitochondrial autophagy by mediating<br/>'Lys-63'-linked polyubiquitination of BNIP1 (PubMed:21931693). Acts in the endoplasmic<br/>reticulum (ER)-associated degradation (ERAD) pathway, which targets misfolded proteins that<br/>accumulate in the endoplasmic reticulum (ER) for ubiquitination and subsequent<br/>proteasome-mediated degradation (PubMed:27485036). Protects cells from ER stress-<br/>induced apoptosis (PubMed:27485036). Responsible for the cotranslational ubiquitination<br/>and degradation of CFTR in the ERAD pathway (PubMed:24019521). Preferentially associates<br/>with the E2 enzymes UBE2J1 and UBE2J2 (PubMed:24019521).[UniProtKB/Swiss-Prot<br/>Function]
