

Product datasheet for RC226975L4

KIAA0748 (TESPA1) (NM_001136030) Human Tagged Lenti ORF Clone

Product data:

Product Type: Expression Plasmids

Tag: mGFP

Symbol: KIAA0748

Synonyms: HSPC257; ITPRID3; KIAA0748

Mammalian Cell Puromycin

Selection:

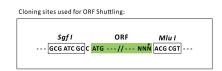

Vector: pLenti-C-mGFP-P2A-Puro (PS100093)

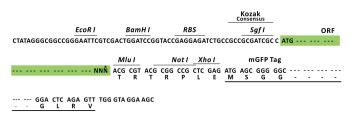

E. coli Selection: Chloramphenicol (34 ug/mL)

ORF Nucleotide Sequence: The ORF insert of this clone is exactly the same as(RC226975).

Restriction Sites: Sgfl-Mlul

Cloning Scheme:

^{*} The last codon before the Stop codon of the ORF.

ACCN: NM_001136030

ORF Size: 1563 bp

KIAA0748 (TESPA1) (NM_001136030) Human Tagged Lenti ORF Clone | RC226975L4

OTI Disclaimer: The molecular sequence of this clone aligns with the gene accession number as a point of

reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing

variants is recommended prior to use. More info

OTI Annotation: This clone was engineered to express the complete ORF with an expression tag. Expression

varies depending on the nature of the gene.

Components: The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube

containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).

Reconstitution Method: 1. Centrifuge at 5,000xg for 5min.

2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.

3. Close the tube and incubate for 10 minutes at room temperature.

4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid

at the bottom.

5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of

shipping when stored at -20°C.

Note: Plasmids are not sterile. For experiments where strict sterility is required, filtration with 0.22um

filter is required.

RefSeq: <u>NM_001136030.2</u>

RefSeq Size: 3862 bp

RefSeq ORF: 1566 bp

Locus ID: 9840

UniProt ID: A2RU30

Cytogenetics: 12q13.2

MW: 59.2 kDa

Gene Summary: Required for the development and maturation of T-cells, its function being essential for the late

stages of thymocyte development (By similarity). Plays a role in T-cell antigen receptor (TCR)-

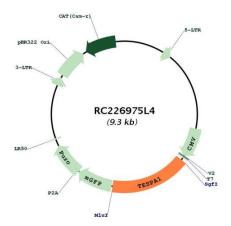

mediated activation of the ERK and NFAT signaling pathways, possibly by serving as a scaffolding protein that promotes the assembly of the LAT signalosome in thymocytes. May play a role in the regulation of inositol 1,4,5-trisphosphate receptor-mediated Ca(2+) release

and mitochondrial Ca(2+) uptake via the mitochondria-associated endoplasmic reticulum

membrane (MAM) compartment.[UniProtKB/Swiss-Prot Function]
