# Product datasheet for RC226976L3V

## Cyclin D3 (CCND3) (NM\_001136125) Human Tagged ORF Clone Lentiviral Particle

### **Product data:**

| Product Type:                | Lentiviral Particles  |
|------------------------------|---|
| Product Name:                | Cyclin D3 (CCND3) (NM_001136125) Human Tagged ORF Clone Lentiviral Particle   |
| Symbol:                      | CCND3   |
| Mammalian Cell<br>Selection: | Puromycin   |
| Vector:                      | pLenti-C-Myc-DDK-P2A-Puro (PS100092)  |
| Tag:                         | Myc-DDK   |
| ACCN:                        | NM_001136125  |
| ORF Size:                    | 660 bp  |
| ORF Nucleotide<br>Sequence:  | The ORF insert of this clone is exactly the same as(RC226976).  |
| OTI Disclaimer:              | The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <u>More info</u> |
| OTI Annotation:              | This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene.  |
| RefSeq:                      | <u>NM 001136125.1</u>   |
| RefSeq ORF:                  | 663 bp  |
| Locus ID:                    | 896   |
| UniProt ID:                  | <u>P30281</u>   |
| Cytogenetics:                | 6p21.1  |
| Protein Families:            | Druggable Genome  |
| Protein Pathways:            | Cell cycle, Focal adhesion, Jak-STAT signaling pathway, p53 signaling pathway, Wnt signaling pathway  |
| MW:                          | 24.1 kDa  |

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2022 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

#### Cyclin D3 (CCND3) (NM\_001136125) Human Tagged ORF Clone Lentiviral Particle – RC226976L3V

Gene Summary:The protein encoded by this gene belongs to the highly conserved cyclin family, whose<br/>members are characterized by a dramatic periodicity in protein abundance through the cell<br/>cycle. Cyclins function as regulators of CDK kinases. Different cyclins exhibit distinct<br/>expression and degradation patterns which contribute to the temporal coordination of each<br/>mitotic event. This cyclin forms a complex with and functions as a regulatory subunit of CDK4<br/>or CDK6, whose activity is required for cell cycle G1/S transition. This protein has been shown<br/>to interact with and be involved in the phosphorylation of tumor suppressor protein Rb. The<br/>CDK4 activity associated with this cyclin was reported to be necessary for cell cycle<br/>progression through G2 phase into mitosis after UV radiation. Several transcript variants<br/>encoding different isoforms have been found for this gene. [provided by RefSeq, Oct 2008]
