

Product datasheet for RC227039

CMKLR1 (NM_001142344) Human Tagged ORF Clone

Product data:

| Product Type: | Expression Plasmids |
|------------------------------|------------------------------------------------|
| Product Name: | CMKLR1 (NM_001142344) Human Tagged ORF Clone |
| Tag: | Myc-DDK |
| Symbol: | CMKLR1 |
| Synonyms: | CHEMERINR; ChemR23; DEZ; RVER1 |
| Mammalian Cell Selection: | Neomycin |
| Vector: | pCMV6-Entry (PS100001) |
| E. coli Selection: | Kanamycin (25 ug/mL) |
| Restriction Sites: | Sgfl-Mlul |
| Cloning Scheme: | Cloning sites used for ORF Shuttling: |
| | Sgfi ORF Miui GCGATOGO C ATG// NNRI ACG OGT |

* The last codon before the Stop codon of the ORF

NM_001142344

1119 bp

ACCN: ORF Size:

| CMKLR1 (NM_001142344) Human Tagged ORF Clone – RC227039 | |
|---------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| OTI Disclaimer: | The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <u>More info</u> |
| OTI Annotation: | This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene. |
| Components: | The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water). |
| Reconstitution Method | Centrifuge at 5,000xg for 5min. Carefully open the tube and add 100ul of sterile water to dissolve the DNA. Close the tube and incubate for 10 minutes at room temperature. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid at the bottom. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of shipping when stored at -20°C. |
| RefSeq: | <u>NM 001142344.2</u> |
| RefSeq ORF: | 1122 bp |
| Locus ID: | 1240 |
| UniProt ID: | <u>Q99788</u> |
| Cytogenetics: | 12q23.3 |
| Protein Families: | Druggable Genome, GPCR, Transmembrane |
| MW: | 42.1 kDa |
| Gene Summary: | Receptor for the chemoattractant adipokine chemerin/RARRES2 and for the omega-3 fatty acid derived molecule resolvin E1. Interaction with RARRES2 induces activation of intracellular signaling molecules, such as SKY, MAPK1/3 (ERK1/2), MAPK14/P38MAPK and PI3K leading to multifunctional effects, like, reduction of immune responses, enhancing of adipogenesis and angionesis. Resolvin E1 down-regulates cytokine production in macrophages by reducing the activation of MAPK1/3 (ERK1/2) and NF-kappa-B. Positively regulates adipogenesis and adipocyte metabolism. Acts as a coreceptor for several SIV strains (SIVMAC316, SIVMAC239, SIVMACL7E-FR and SIVSM62A), as well as a primary HIV-1 strain (92UG024-2). [UniProtKB/Swiss-Prot Function] |
