## Product datasheet for RC227713L2V

## ROBO1 (NM\_001145844) Human Tagged ORF Clone Lentiviral Particle

## **Product data:**

Product Type:	Lentiviral Particles
Product Name:	ROBO1 (NM_001145844) Human Tagged ORF Clone Lentiviral Particle
Symbol:	ROBO1
Synonyms:	axon guidance receptor; DUTT1; FLJ21882; MGC131599; MGC133277; roundabout, axon guidance receptor, homolog 1 (Drosophila); roundabout 1; SAX3
Mammalian Cell Selection:	None
Vector:	pLenti-C-mGFP (PS100071)
Tag:	mGFP
ACCN:	NM_001145844
ORF Size:	4818 bp
ORF Nucleotide Sequence:	The ORF insert of this clone is exactly the same as(RC227713).
OTI Disclaimer:	The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <u>More info</u>
OTI Annotation:	This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene.
RefSeq:	<u>NM 001145844.1, NP 001139316.1</u>
RefSeq ORF:	4820 bp
Locus ID:	6091
Cytogenetics:	3p12.3
Protein Families:	Druggable Genome
Protein Pathways:	Axon guidance
MW:	175.7 kDa

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2022 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

## ROBO1 (NM\_001145844) Human Tagged ORF Clone Lentiviral Particle – RC227713L2V

Gene Summary:Bilateral symmetric nervous systems have special midline structures that establish a partition<br/>between the two mirror image halves. Some axons project toward and across the midline in<br/>response to long-range chemoattractants emanating from the midline. The product of this<br/>gene is a member of the immunoglobulin gene superfamily and encodes an integral<br/>membrane protein that functions in axon guidance and neuronal precursor cell migration.<br/>This receptor is activated by SLIT-family proteins, resulting in a repulsive effect on glioma cell<br/>guidance in the developing brain. A related gene is located at an adjacent region on<br/>chromosome 3. Multiple transcript variants encoding different isoforms have been found for<br/>this gene. [provided by RefSeq, Mar 2009]
