Product datasheet for RC227744L3V

Artemin (ARTN) (NM_001136215) Human Tagged ORF Clone Lentiviral Particle

Product data:

Product Type:	Lentiviral Particles
Product Name:	Artemin (ARTN) (NM_001136215) Human Tagged ORF Clone Lentiviral Particle
Symbol:	Artemin
Synonyms:	ART; ENOVIN; EVN; NBN
Mammalian Cell Selection:	Puromycin
Vector:	pLenti-C-Myc-DDK-P2A-Puro (PS100092)
Tag:	Myc-DDK
ACCN:	NM_001136215
ORF Size:	684 bp
ORF Nucleotide Sequence:	The ORF insert of this clone is exactly the same as(RC227744).
OTI Disclaimer:	The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <u>More info</u>
OTI Annotation:	This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene.
RefSeq:	<u>NM 001136215.1</u>
RefSeq ORF:	687 bp
Locus ID:	9048
UniProt ID:	<u>Q5T4W7</u>
Cytogenetics:	1p34.1
Protein Families:	Druggable Genome, Secreted Protein
MW:	23.62 kDa

This product is to be used for laboratory only. Not for diagnostic or therapeutic use. ©2024 OriGene Technologies, Inc., 9620 Medical Center Drive, Ste 200, Rockville, MD 20850, US

Gene Summary:This gene encodes a secreted ligand of the glial cell line-derived neurotrophic factor (GDNF)
subfamily and TGF-beta (transforming growth factor-beta) superfamily of proteins. Ligands of
this family bind various TGF-beta receptors leading to recruitment and activation of SMAD
family transcription factors that regulate gene expression. The encoded preproprotein is
proteolytically processed to generate each subunit of the disulfide-linked homodimer. This
protein signals through the RET receptor and GFR alpha 3 coreceptor, and supports the
survival of a number of peripheral neuron populations and at least one population of
dopaminergic CNS neurons. This protein has also been shown to promote tumor growth,
metastasis, and drug resistance in mammary carcinoma. [provided by RefSeq, Aug 2016]
