

# **Product datasheet for RC228174**

## KLF6 (NM\_001160124) Human Tagged ORF Clone

### **Product data:**

**Product Type:** Expression Plasmids

Product Name: KLF6 (NM\_001160124) Human Tagged ORF Clone

Tag: Myc-DDK

Symbol: KLF6

Synonyms: BCD1; CBA1; COPEB; CPBP; GBF; PAC1; ST12; ZF9

**Vector:** pCMV6-Entry (PS100001)

E. coli Selection: Kanamycin (25 ug/mL)

Cell Selection: Neomycin

ORF Nucleotide >RC228174 representing NM\_001160124
Sequence: Red=Cloning site Blue=ORF Green=Tags(s)

**Restriction Sites:** 

Sgfl-Mlul

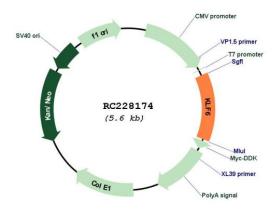

**Cloning Scheme:** 

<sup>\*</sup> The last codon before the Stop codon of the ORF

#### Plasmid Map:

**ACCN:** NM\_001160124

ORF Size: 723 bp

**OTI Disclaimer:** 

Due to the inherent nature of this plasmid, standard methods to replicate additional amounts of DNA in E. coli are highly likely to result in mutations and/or rearrangements. Therefore, OriGene does not guarantee the capability to replicate this plasmid DNA. Additional amounts of DNA can be purchased from OriGene with batch-specific, full-sequence verification at a reduced cost. Please contact our customer care team at <a href="mailto:custsupport@origene.com">custsupport@origene.com</a> or by calling 301.340.3188 option 3 for pricing and delivery.

The molecular sequence of this clone aligns with the gene accession number as a point of reference only. However, individual transcript sequences of the same gene can differ through naturally occurring variations (e.g. polymorphisms), each with its own valid existence. This clone is substantially in agreement with the reference, but a complete review of all prevailing variants is recommended prior to use. <u>More info</u>

**OTI Annotation:** 

This clone was engineered to express the complete ORF with an expression tag. Expression varies depending on the nature of the gene.

Components:

Cytogenetics:

The ORF clone is ion-exchange column purified and shipped in a 2D barcoded Matrix tube containing 10ug of transfection-ready, dried plasmid DNA (reconstitute with 100 ul of water).

**Reconstitution Method:** 

- 1. Centrifuge at 5,000xg for 5min.
- 2. Carefully open the tube and add 100ul of sterile water to dissolve the DNA.
- 3. Close the tube and incubate for 10 minutes at room temperature.
- 4. Briefly vortex the tube and then do a quick spin (less than 5000xg) to concentrate the liquid at the bottom.
- 5. Store the suspended plasmid at -20°C. The DNA is stable for at least one year from date of shipping when stored at -20°C.

RefSeq: <u>NM 001160124.2</u>

10p15.2

 RefSeq ORF:
 726 bp

 Locus ID:
 1316

 UniProt ID:
 Q99612

**Protein Families:** Druggable Genome, ES Cell Differentiation/IPS, Transcription Factors

MW: 26.9 kDa

**Gene Summary:** This gene encodes a member of the Kruppel-like family of transcription factors. The zinc

finger protein is a transcriptional activator, and functions as a tumor suppressor. Multiple transcript variants encoding different isoforms have been found for this gene, some of which

are implicated in carcinogenesis. [provided by RefSeq, May 2009]
